

## Coordinate Switches, Complete

Joystick switches control auxiliary circuits permitting movements in various directions of machines and equipment.

The switches are designed for front panel mounting. They are climate-proof.

### Operation

The 3SB14 00-0J contact block is used, which due to its depth cannot be built into 3SB38 enclosures.

Switches are available as follows:

- With 2 or 4 positions
- With momentary contact or latching
- With or without mechanical interlocking

In the case of switches with mechanical interlock in O position, the switch is unlatched with the unlatching button at the front of the actuating lever.

### Inscriptions

A name plate consisting of a black, molded-plastic label holder and two or four adhesive labeling plates of 27 mm x 27 mm in size is available for labeling purposes. These labels can be supplied with and without customized inscription.

Note insert dimensions!
