

Narrow Stitching Head

UNIVERSAL 48/5-S

A narrow stitching head for standard stitching or loop stitching.

- For installation on gathering machines, gang stitchers, stitching units on folding machines and automatic bindery flow lines for exercise books, pads etc.
- Top quality at a reasonable price – a typical Hohner stitching head; reliable, accurate and long lasting.
- This stitching head easily works at up to 13,000 cycles per hour and is especially designed for collating machines and smaller saddle binders.
- With a minimum distance of 48 mm (1.89 in.) between stitch centers the UNIVERSAL 48/5-S is the ideal stitching head for small brochures and booklets.
- The UNIVERSAL 48/5-S is easily mounted from the front with all adjustments easily accessible, making set up extremely simple.
- When converting to loop stitching, only the former, bender and leaf spring need changing. This makes conversion extremely simple with a minimum of down time.
