

SIMATIC S7-400

Mounting racks

Introduction

Overview

- The basic mechanical framework of the SIMATIC S7-400/S7-400H
- For accommodating the modules, supplying with operating voltage and connecting the modules via the backplane bus
- Several variants for establishing central controllers and expansion units

Application

Racks form the mechanical framework of the SIMATIC S7-400. They perform the following functions:

- They provide mechanical support for the modules.
- They provide the power supply to the modules.
- They link individual modules together by way of the backplane bus.

Racks are designed for wall mounting or installation in frames or cabinets.

Several racks are available for setting up the SIMATIC S7-400:

- UR1 and UR2 racks; for central controllers and expansion units.
- CR2 racks; for segmented central controllers (with two CPUs operating in parallel in a single rack independently of each other).

- ER1 and ER2 racks; for expansion units with signal modules.
- UR2-H rack; for S7-400H.

4

Design

All racks consist of the following:

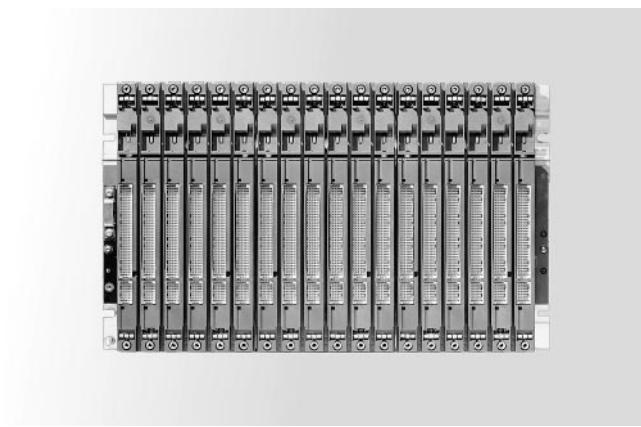

- An aluminum mounting rail with threaded bolts to mount the modules as well as lateral recesses to mount the rack on a wall or other support.

- Plastic guide pieces direct the module as it is being swung into place.
- Connection for grounding conductors.
- Backplane bus with plug-in connectors.

Technical specifications

Mounting racks	UR1	UR2	CR2	UR2-H	ER1	ER2
Number of single-width slots	18	9	18, 2 segments with 8 or 10 slots	18	18	9
Buses	P, K	P, K	P, K	P, K	P	P
Dimensions (W x H x D) in mm	482.5 x 290 x 27.5	257.5 x 290 x 27.5	482.5 x 290 x 27.5	482.5 x 290 x 27.5	482.5 x 290 x 27.5	257.5 x 290 x 27.5
Weight approx.	3 kg	1.5 kg	3 kg	3 kg	2.5 kg	1.25 kg

Overview

- UR1 rack (universal rack) for setting up central controllers and expansion units (see page 4/91).
- For up to 18 modules.
- Standard PS (power supply) and redundant PS can be used in the standard S7-400 system.
- Can be expanded in a central configuration (up to 3 m) or distributed (up to 100 m).
- Required for expansions: Interface modules (send IMs); Up to six interface modules can be plugged in.
- Up to 21 expansion units can be connected.

SIMATIC S7-400

Mounting racks

UR2-H rack for S7-400H

4

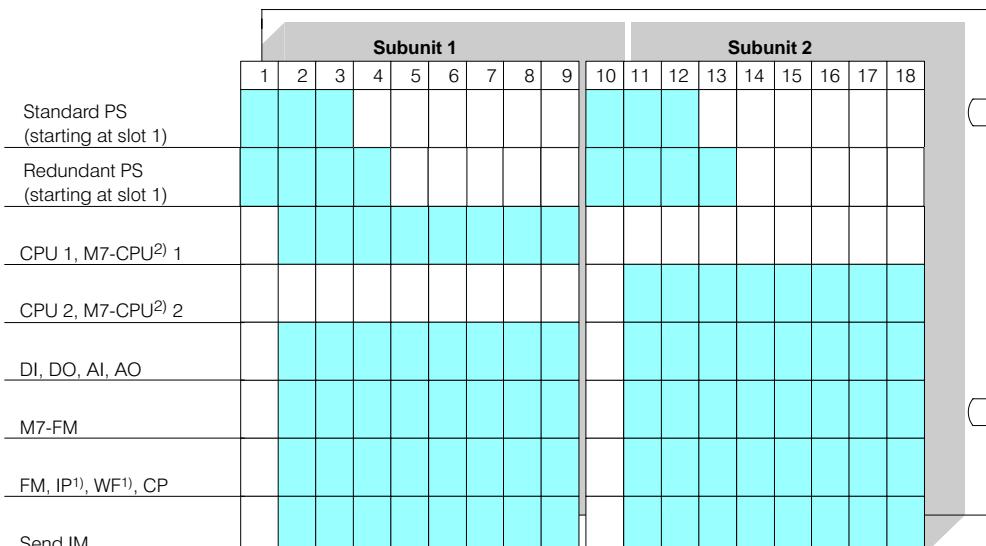

Overview

- UR2-H mounting rack for setting up a complete S7-400H system in one mounting rack
- Also suitable for S7-400: operation of 2 separate CPUs with their own I/O (own P and K bus)
- Can also be used as expansion rack
- For up to 18 modules
- 2 CPUs each with its own I/O can be operated adjacently to each other: 2 P bus and 2 K bus segments, each with 9 slots and each for 1 CPU with its own I/O
- The following are always required:
2 power supply modules (PSs) and 2 CPUs
- Standard PS and redundant PS can be used in the standard S7-400 system
- Can be expanded centrally (up to 3 m) and in distributed configuration (up to 100 m)
- The following are required for expansions:
interface modules (send IMs);
up to 6 interface modules can be plugged in
- Up to 21 expansion racks can be connected

Overview

- Fan for the SIMATIC S7-400
- Required when using modules with especially high heat generation

Application

A fan subassembly is needed when the modules in a rack must be ventilated, for example as in the M7 CPU 488-5.

Any such requirement is specified with the relevant modules.

Design

The fan subassembly consists of:

- The base part with the cable duct
- Three fans and
- An electronic monitoring unit.
- Different power voltages; variants for 24 V DC and 120/230 V AC.

- Compact construction; simply mount fan subassemblies under the rack.
- Easy-to-service design; fans, air filters and electronics modules (the monitoring unit and the power-supply unit) can be replaced from the front, without tools.
- Cable duct; cables may be laid clearly in the cable duct toward the sides. The duct permits connection of the line shielding. The cable duct has a locking front panel.
- Redundant ventilation; if one fan fails, the two remaining fans ensure adequate ventilation. Failures are indicated by LEDs on the front and signaled by relay contacts.
- Variable air intake area; intake air can be drawn from the space in back or from below.

Technical specifications

Supply voltage	24 V DC; 120/230 V AC
• Rated value	
• Permissible range	19.2 to 30 V DC; 85 to 132 V AC/170 to 264 V
Input current	
• Rated value for 120 V AC	170 mA
• Rated value for 230 V AC	86 mA
• Rated value for 24 V DC	450 mA

Line frequency	
• Rated value	50/60 Hz
• Permissible range	47 to 63 Hz
Power loss DC/AC	11 W/20 W
Relay contact values	24 V DC / 200 mA
Dimensions (W x H x D) in mm	482.5 x 109.5 x 235
Weight	approx. 1.6 kg

SIMATIC S7-400

Mounting racks

Expansion with SIMATIC S5 expansion units

4

Overview

- SIMATIC S5 expansion racks for distributed expansion of the S7-400
- For connecting to existing SIMATIC S5 systems

Application

The SIMATIC S7-400 can be expanded in a distributed configuration with expansion units from the SIMATIC S5-115U or SIMATIC S5-135U and S5-155U range. This means SIMATIC S7 systems can be linked with existing SIMATIC S5 systems to enhance the performance of the entire controller.

The following can be connected:

- ER 701-2 and ER 701-3 expansion units from the SIMATIC S5-115U range, and
- EG 183U and EG 185U expansion units from the SIMATIC S5-135U and S5-155U range.

Design

The following specifications apply for expanding an S7-400 with SIMATIC S5 expansion units:

- IM 463-2 interface module; plugged into the SIMATIC S7-400 central controller (see page 4/105). Up to four IM 463-2s can be plugged into any central controller.

- IM 314 interface module; plugged into SIMATIC S5 expansion units. A terminator must be plugged into the last IM 314 module.

- Maximum configuration; up to 32 SIMATIC S5 expansion units may be connected to an S7-400 central controller. These expansion units may also be expanded centrally (by means of IM 300-3, IM 300-5 or IM 306).
- Transmission distance; the maximum acceptable distance between the central unit and the last expansion unit in a line is 600 m.

Compatible SIMATIC S5 units (continued) (see Catalog ST)
