Overview

Experience the Sta-Kon advantage.

Sta-Kon developed the first tool-applied solderless terminals and connectors more than 70 years ago in response to industry awareness of the need for better performance of electrical systems.

Key features and benefits

- Metal insulation grip sleeve is included on all nylon terminal for strain relief
- Long barrel selectively annealed
- CSA Certified
- UL Listed unless otherwise specified

Deep internal serrations

After the insertion of a wire into the terminal's barrel, a deep, serrated interior ensures a large area of contact that lowers the resistance of a connection. With the mechanical force of the tool, the wire strands cold flow into the serrated interior. This guarantees electrical resistance lower than the wire to which it is applied. This feature also prevents pullout from vibration and mechanical strain. Deep internal serrations can be compared to the effective holding power of a well-treaded tire on a wet highway.

Funneled terminal barrel entry

This feature makes wire insertion faster and easier. A funneled barrel eliminates wire strand "hang up" upon insertion into the terminal's barrel. The loss of even a couple of wire strands can have negative results on electrical efficiency and resistance to mechanical strain.

Sta-Kon long barrel design

If lowering electrical resistance, preventing wire pullout, eliminating a "missed" crimp and having an insulator that stays on the barrel during installation are your goals, then you must design a terminal with a long barrel. This also provides the insulator with additional surface area, holding tight to the barrel. Most competitive barrel lengths range from 20–50% shorter than Sta-Kon terminals. The results are usually a stream of electrical failure, rework and added expense. Many competitive insulators come off during crimping due to a limited barrel length.

Note: Listed for solid wire up to #10 AWG, terminals only.

Why Sta-Kon terminals are better

Selective annealing

Because of the mechanical strength of copper, an installer can experience fatigue associated with repeated installations. For this reason, ABB puts our terminals through one more step called selective annealing. This process leaves the barrel soft enough to crimp and form around the wire. However, we “cold form” the tongue during the manufacturing process so it remains strong. This is done so the tongue can withstand repeated bends and bolt tightening strain common in most electrical installations. Many competitors attempt to accomplish similar goals by removing valuable material or using a softer copper that has lower conductivity. This increases electrical resistance as well as the odds for shorting and downtime.

Anti-rotational tongues

This is a unique feature to the ABB ring tongue terminal. This design prevents terminal shorting by keeping the terminal secure in the terminal block. The installer can place a greater number of terminals closer together without worry.

Proper identification

We identify all terminals with wire and stud sizes. These markings are clearly visible on the surface of the tongue, taking any guesswork out of replacing or reordering additional parts. Our superior bright plating also assists in visibility.

All Sta-Kon terminals are deburred and degreased

To ensure a Sta-Kon terminal is properly plated and insulated, all our parts are put through a process that cleans and smooths the terminal of any manufacturing residues, mainly grease, oils and sharp edges. Many competitive products do not put their product through such rigorous finishing.

Platings

Electro-plated tin is the standard. All others require minimum order quantities and are generally not stocked. Alternative platings as follows: gold, silver, tin-alloys, nickel, etc. The following finishes are available on most one-piece Sta-Kon terminals:

Finish	Suffix	Spec.	Temp. Rating
Gold plate	GP	MIL-G-45204 Type II, Grade B, C, D, Class O	260 °C
Nickel plate	NP	QQ-N-290 Class 2, Grade G	260 °C
Plain finish	PF	None	150 °C
Silver plate	SP		150 °C
Tin plate	TP		150 °C

To order, add the indicated suffix to the regular catalogue number.

Underwriters Laboratories listing

Sta-Kon rings, forks, locking forks, two-way splices and disconnects are tested and listed to UL standards and all applicable products to CSA standards.

- Flat bottom box
- Electro-tin plating
- Center reinforced spring detent for minimum insertion force
- Compound spring rails provide positive contact after repeated insertions

Overview

01 ERG4001

Sta-Kon ring, fork and locking fork

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections ... many styles available for military applications
- Sta-Kon products exceed test specification requirements of military, UL and CSA
- Fluoropolymer and nylon terminals provided with extra metal sleeve to grip insulation
- Vinyl-insulated and bare Sta-Kon terminals feature brazed seam wire barrels that can be crimped at any place on the barrel circumference
- Ring and fork terminals can be used with solid wire as follows:
 - Non-insulated: 22–8 AWG
 - Insulated: 22–10 AWG

Sta-Kon disconnects

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel entry insulators allow for easier inserting of wire into barrel
- Colour-coded for easy installation

The Shure-Stake® tools are matched to terminals

The Shure-Stake mechanism prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp everytime. ABB tooling techniques correctly match tools, wire size and terminal to produce optimum mechanical and electrical performance.

Sta-Kon RA, RB and RC insulated quick disconnect products are now UL Listed at 600 volts.

Sta-Kon technical data

Terminals and splices insulation rating	UL 94 flammability	Voltage	Temperature
Nylon	V-2	600	105 °C
Vinyl	V-0	600	105 °C
Tefzel®	V-0	600	105 °C
Disconnects (non-insulated)		300	105 °C

Tefzel is a registered trademark of DuPont.

The Sta-Kon terminals numbering system

Distributor package 100/50

Bulk OEM package 1000/500

Common to both packages

- Letter **A** denotes 22–18 AWG wire range = Red
- Letter **B** denotes 16–14 AWG wire range = Blue
- Letter **C** denotes 26–22 AWG, 12–10 AWG wire range = Yellow
- Letter **R** preceding the above letters indicates the terminal is insulated
- No letter **R**... no insulation... no exception!

Distributor packaged

Part numbers are very descriptive, indicating insulation and type, stud size, tongue style and the largest maximum wire that can be put inside.

- If the letter **R precedes** the number, the part is nylon insulated – RA18-6
- If the letter **R follows** the number, the part is vinyl insulated – 14RB-8

Example: 10RC-8F

C	Indicates 12–10 AWG
10RC	Vinyl insulated
8	Indicates stud size
F	Means a fork tongue terminal
FL	Would indicate locking fork

Example: 2RA18X

2	Indicates a 2-way or butt-style connector
X	Means expanded insulation

Ring terminals

Nylon-insulated ring terminals

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections... many styles available for military applications
- Sta-Kon products exceed test specification requirements of military, UL and CSA
- Include extra metal sleeve to grip insulation
- Vinyl insulated and bare Sta-Kon terminals feature brazed seam wire barrels that can be crimped at any place on the barrel circumference
- Can be installed with crimping tools having a single indentor or double indentor (recommended for solid wire)
- Serrated barrel increases grip on wire
- Wire range identification on the tongue of each terminal
- Constructed of electrolytic copper for high conductivity

Diagram

Fork terminals

Nylon-insulated forks

- Fork terminals enable easy installation because the mounting screw does not have to be completely removed
- Brazed-seam barrel is serrated for high pull-out value
- Terminal is high-conductivity electrolytic copper, electro-tin plated
- Insulation is colour-coded
- Vinyl-insulated fork terminals have extra-long PVC insulation sleeve for protection and stress relief at wire's flex point

Diagram

Pin terminals

- Provide an easy and effective way to terminate stranded wire into European/metric style terminal blocks
- Designed to prevent shorting, wire strand loss and/or wire pullout resulting from improper termination of stranded wire
- Designed to meet emerging global standards that require wire-to-metric style terminal block installations be terminated with a “pin” style terminal
- Available in vinyl-insulated, nylon-insulated and non-insulated styles
- All styles offered in 22 AWG to 10 AWG and compatible with existing Sta-Kon tooling

- Wires are laid side by side in the connector, and the connection is made in one crimp
- Offers advantages in simplicity of installation and small size
- One crimp completes the splice

Wire joints

High-temperature wire joints

- Rated for temperatures up to 150 °C (302 °F), 600 V maximum
- Molded, one-piece nylon construction for electrical insulation, UL94-V2
- Braided copper sleeve prevents separation of connection during crimping
- Internal serrations enable cold flow for increased conductivity and pull-out strength

Heat-shrinkable terminals, splices and disconnects

- These ring terminals, butt splices and disconnects are self-insulated with heat-shrinkable polyolefin and internally coated sealant
- Upon completed installation, a fully sealed connection is achieved to protect the joint against the degrading effects of galvanic action, corrosion and environmental exposure

Note: Not approved for outdoor use

Everything you need to make fully sealed connections in one handy kit

- Tools: (1) butane torch; (1) wire stripper; (1) ratchet crimp tool
- Butt splices: (20) #22-#18 AWG; (20) #16-#14 AWG; (15) #12-#10 AWG
- Ring terminals: (20) #16-#14 AWG #10 stud; (2) #16-#14 AWG #8 stud; (15) #12-#10 AWG ¼ in. stud

Heat-shrink terminal kit with tools

Cat. no.	Description	Std. pkg. qty.
STAPOUCH-HS	Heat-shrink terminal kit with tools	1

Disconnects and male tabs

250 Series — Female disconnects

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel-entry insulators enable easier inserting of wire into barrel
- Colour-coded for easy installation

250 Series — female disconnects

- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect
- offers long-term dependability
- Brazed-seam serrated barrel provides maximum tensile strength

187 Series — female disconnects

- Quick, reliable method of connection to terminal blocks and boards without the use of tools
- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect offers long-term dependability

Luminaire disconnects

Disconnect ballasts under load for safe servicing – in compliance with NEC® requirements.

—
This cutaway shows how the Sta-Kon luminaire disconnect grips and holds the pushed-in wires securely after installation

Push-in luminaire disconnect
Each year, electricians sustain injuries while attempting to change ballasts without tripping the breaker because they’re trying to avoid disconnecting other lighting and equipment from power. That’s why recent changes to NEC and UL standards require a means of disconnecting power to non-residential fluorescent lighting ballasts.

In 2006, ABB developed the first UL Listed product to meet this need. In response to customer demand, the Sta-Kon push-in luminaire disconnect provides all the same safety benefits as the original, but installs even faster and easier.

- Enables electricians changing ballasts to easily disconnect incoming power for safe servicing without having to trip the main power breaker
- Installs easily – just strip de-energized wires and insert
- Disconnect halves snap together and separate easily – but won’t accidentally disconnect
- Foolproof design eliminates the potential for incorrect installation and reverse polarity
- Fits through ½ in. knockouts for easy retrofit

- Ballast hot-lead wire entry is colour-coded black for easy visibility
- Finger-safe on both sides
- For use in all non-residential fluorescent lighting applications and in ordinary location HID lighting applications – both up to 600V, 4A maximum
- Complies with NEC, CEC, UL and CSA requirements
- Sold in mated pairs (male/line and female/load sides)

- Specifications**
- Housing: Polycarbonate
 - Temperature rating: 105 °C (221 °F) max.
 - Electrical rating: 600 V, 4 A max.
 - Flammability rating: UL94V-2
 - Contacts: Copper alloy
 - Wire range: #18–#12 AWG solid copper
#14–#12 AWG stranded copper (19 strands or fewer)
 - Standards: Complies with 2008 NEC 410.130(G) and CEC 30-308(4)
 - Certifications: UL Listed, CSA Certified

—
Sta-Kon push-in luminaire disconnect

Cat. no.	Description	Std. pkg. qty.
LD2P-Q	2-Wire push-in luminaire disconnect, distributor pack	25
LD2P-D	2-Wire push-in luminaire disconnect, bulk packaging	500

Note: If you prefer lead wires instead of a push-in design and/or need a 3-wire disconnect for switching or dimming applications, order the original Sta-Kon luminaire disconnect, 2-wire cat. no. LD2 (cat. no. LD2-D for bulk packaging) or 3-wire cat. no. LD3 (cat. no. LD3-D for bulk packaging). See following page.

Luminaire disconnects and disconnect installation tool

Luminaire disconnects

Cat. no.	Description
LD2C-D	2-pole luminaire disconnect (Marrettes not included)
LD3C-D	3-pole luminaire disconnect (Marrettes not included)
LD2-C	2-pole luminaire disconnect (2 x 4 Marrettes 333 /inner bag)
LD3-C	3-pole luminaire disconnect (6 of each Marrettes (331 + 333) /inner bag)

Packaging options

Cat. no.	Pkg. Format	Std. pkg. (min./mult.)
Bulk		
LD2C-D	Box	Sold without Marrettes Sold in multiple of 500
LD3C-D	Box	Inner: 50 per inner bag Outer: 250 per outer box Master: 500 in master box
Kits		
LD2-C	Bag	Sold with Marrettes Sold in multiple of 20
LD3-C	Bag	Inner: 2 per inner bag Outer: 20 per outer box Master: 200 in master box

This one-of-a-kind tool may be used to seat all sizes of Sta-Kon disconnects.

Faster, easier and safer than manual seating of disconnects.

- Perfect for wire-harness assemblers and panel builders
- Dual-ended with slots to fit red and blue (male and female) or yellow disconnects
- Colour-coded dots for easy matching of disconnect with correct tool end
- Lightweight and only 5½ in. long — fits in a shirt pocket like a pen

Disconnect installation tool

Cat. No.	Description	Pkg. qty.
DT22-10	Sta-Kon disconnect installation tool	1

Ferrules

Features

- Ferrules ensure reliable electrical connections when terminating conductors in screw clamp terminal blocks
- Fraying and breaking of wire strands is prevented and the possibility of an unreliable connection is minimized
- Insulated ferrules prevent conductor breakage due to bending, wire stress or vibration, while facilitating wire insertions into the terminal block clamp
- Ferrules are the preferred alternative to twisting wire stands or tinning the wire end before terminating into a terminal block
- Ferrules are thin-walled copper tubes, which are mechanically crimped onto the ends of stranded wires
- They are easy to use — simply strip the wire, slide the ferrule onto the end of the wire and crimp
- Meets emerging global standards, requiring wire-to-metric style terminal block installations to be terminated with a “pin” style terminal

- Vinyl-insulated, nylon-insulated and non-insulated styles
- All styles offered in #22 AWG to #10 AWG and compatible with existing Sta-Kon tooling

How to apply a ferrule

- Strip the insulation from the end of the wire and insert into the insulated end of the ferrule
- Using the designated crimping tool, place the metal shaft into the tool's appropriate slot. Compress the tool to make a crescent-shape depression along the length of the ferrule
- Insert the crimped ferrule into the terminal block
- Tighten the ferrule and wire into the terminal block

Materials

- High-conductivity copper
- Tin plating

Sta-Kon mini-pack terminals

Convenient 20-count packaging.

- Wire ranges from #22 AWG to #10 AWG
- Vinyl-insulated ring and forked-tongued terminals, female disconnects, butt-type splice connectors

Note: "CP" designates mini-pack quantities. Refer to other catalogue pages for description and dimensional information.

Sta-Org™ terminal and splice organizer kit

Lightweight, durable, nylon construction.

- Ideal for contractors, OEMs or any other user of terminals and splices
- Slips in a tool box or sits on your bench — only 6.6 in. L x 3 in. dia.
- Bench-mountable (hardware included)
- Kit contents
 - (1) blue nylon organizer/carrier
 - (6) see-through nylon canisters with lids
 - (20) #12–#10 AWG vinyl ring terminals (cat. no. 10RC-10)
 - (25) #18–#14 AWG vinyl ring terminals (cat. no. 14RB-10)
 - (15) #12–#10 AWG vinyl butt splices (cat. no. 2RC-10X)
 - (25) #18–#14 AWG vinyl butt splices (cat. no. 2RB-14X)
 - (20) #12–#10 AWG vinyl fork terminals (cat. no. 10RC-10F)
 - (25) #18–#14 AWG vinyl fork terminals (cat. no. 14RB-10F)

Installing kits

Terminal kits

For residential or light commercial installations, we recommend this proven assortment of popular Sta-Kon vinyl terminals. This kit includes a WT112M crimping tool.

Terminal kit

Kit contains:

- 36 2RA18X butt splices for 22–16 AWG
- 36 18RA-8F fork terminals for 22–16 AWG
- 36 18RA-10F fork terminals for 22–16 AWG
- 36 18RA-8 ring terminals for 22–16 AWG
- 36 18RA-10 ring terminals for 22–16 AWG
- 36 2RB14X butt splices for 16–14 AWG
- 36 14RB-10F fork terminals for 18–14 AWG
- 36 14RB-250F disconnects for 22–18 AWG
- 36 14RB-8F fork terminals for 18–14 AWG
- 36 14RB-8 ring terminals for 18–14 AWG
- 36 14RB-10 ring terminals for 18–14 AWG
- 25 2RC10X butt splices for 12–10 AWG
- 25 10RC-8F fork terminals for 12–10 AWG
- 25 10RC-10 ring terminals for 12–10 AWG
- 20 RC55 wire joints
- 1 WT112M crimping tool
- 50 PRO-BLU 933 wire connector, blue, for 22–8 AWG

Cat. no.	Description	Pkg. qty.
SK-CLASSIQUE	Terminal kit	1

Perfect for residential or light commercial installations.

- Assortment of popular Sta-Kon vinyl terminals
- Kit includes a WT112M crimping tool
- Includes cable ties and wire marker book

Sta-Kit installing kit

Kit contains:

- 100 2RA18X butt splices for 22–18 AWG
- 100 2RB14X butt splices for 18–14 AWG
- 50 2RC10X butt splices for 12–10 AWG
- 50 10RC-10 ring terminals for 12–10 AWG
- 50 10RC-10FL locking fork terminals for 12–10 AWG
- 50 10RC-250F disconnects for 12–10 AWG
- 100 14RB-10 ring terminals for 18–14 AWG
- 100 14RB-8FL locking fork terminals for 18–14 AWG
- 100 14RB-250F disconnects for 18–14 AWG
- 100 18RA-8F fork terminals for 22–18 AWG
- 100 18RA-6FL locking fork terminals for 22–18 AWG
- 100 18RA-250F disconnects for 22–18 AWG
- 1 WM-0-THRU9 wire marker book
- 1 WT112M crimping tool
- 100 TY525M Ty-Rap® cable ties (approx. length 7½)

Note: All splices, terminals and disconnects are vinyl insulated.

The Shure-Stake mechanism on mechanical ratchet tools and power tools prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp every time. ABB tooling techniques correctly match tools, wire size and terminal to produce optimum mechanical and electrical performance.

Application tools

The proper installation procedure for the quality-assured connection.

—
01 ERG4001
Shure-Stake tools are
matched to terminals

The proper installation of terminals, splices and connectors is very important to the efficient performance of an electrical system. The properly installed connector will enable good conductivity through the termination. Certain basic requirements must be met to make a good termination.

- Strip the insulation carefully to avoid nicking or cutting conductor strands
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug

A poor termination results in a high-resistance connection. A poor connector installation may cause damage or failure of an entire system.

Safety warning: Keep fingers and hands away from mechanism during crimp function.

Installation procedure

- Strip the insulation carefully to avoid nicking or cutting conductor strands.
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug.
- Train the wires to eliminate fanning of strands.
- Open handles fully.
- Insert terminal in proper die nest and locate it as shown below. When crimping a butt splice, position in proper die nest with window facing indenter.
- Close handles slightly to secure terminal. Do not deform terminal.
- Insert properly stripped wire into terminal.
- Complete crimp by closing handles.

—

Diagram

Application tools

- A Colour-coded die nests (left and right side) provided for proper crimping of insulated terminals
- B Shure-Stake mechanism ensures a proper crimp every time
- C Crimp-Assist foot provides stability when work surface leverage is needed to crimp larger connectors
- D Ergonomically advanced, soft, over-molded handle grips reduce strain and enhance user comfort
- E Requires one of the lowest handle forces of any tooling in its class – 25% less than the previous generation of Comfort Crimp tools

Redesigned family of termination tools sets a new standard for manual crimping tools. The most comfortable crimp available from a manual compression tool.

Sta-Kon Comfort Crimp compression tools previously set the standard for manual crimp tools. Now, ABB engineers have made a great line of tools even better with the newly redesigned Sta-Kon Comfort Crimp compression tools. We kept all the performance features that made the tools industry leaders, such as the Shure-Stake mechanism and interchangeable dies with colour-coded die nests, and focused on creating the best possible user experience in terms of comfort and reduction of strain.

Ergonomic handles position the user’s hands correctly to minimize the risk of strain, and soft, over-molded grips cushion fingers and palm for user comfort. A new Crimp-Assist™ foot stabilizes the tool when the user needs to place it on a work surface for leverage to crimp larger connectors. Best of all, the redesigned Comfort Crimp tools require 25% less handle force to complete the crimp cycle than the previous generation — and up to 75% less handle force than competing tools.

Requiring one of the lowest handle forces of any tool in its class, the Comfort Crimp tool family provides maximum comfort to installers, without sacrificing the durability or performance associated with ABB tools.

- Perfect for OEM, MRO and field use
- UL Listed for use with Sta-Kon connectors
- Shure-Stake mechanism ensures a complete crimp cycle before release for a proper crimp every time
- Colour-coded die nests for easy matching with Sta-Kon insulated terminals
- Creates integrity dots for quick verification of proper crimp
- Advanced manufacturing methods for improved durability and tool life
- Lanyard hole in handle for easy tethering to workstation
- Calibration service available through ABB Tool Services

Comfort Crimp compression tools

* Can also be used on nylon

Application tools

BAT22-6NV2 Battery-powered crimping tool

The Sta-Kon BAT22-6NV2 is motorized and automatic for effortless, single-lever crimping.

This is an excellent tool for various markets including panel builders, system integrators, data centers, utilities and various other OEM and MRO applications.

The lightweight, ergonomic design minimizes the risk of repetitive motion injuries that can occur with traditional hand crimping tools.

- 150,000 cycle lifespan
- Extremely light and efficient
- Crimps both Sta-Kon and Dragon Tooth terminals

- Comes complete with extra battery, charger and carrying case
- Powerful lithium-ion battery with charge-level indicator
- Single-lever motorized operation for easy manual preclamping, automatic crimping and auto-retract functions
- Motor-stall protection in case of faulty operation
- LED work light illuminates work areas

Included accessories

- Sturdy, plastic carrying case for portability
- Two 10.8 V lithium-ion batteries and charger
- Sturdy tray for convenient storage of crimp dies

Installing dies for BAT22-6NV2

Cat. no.	Description	Pkg. qty.
BAT22-6NV2	Battery-powered crimping tool with two 10.8 V lithium-ion batteries	1

Application tools

PAIR22-6 Air crimp tool

- Heavy-duty portable tool.**
- 1.25 tons output force at 100 psi
 - Crimps #22–#6 AWG terminals
 - Installs Sta-Kon terminals as well as ferrules and Dragon Tooth™ connectors
 - Interchangeable dies
 - Open yoke enables easy access to insert and remove terminals for crimping

Installing dies for PAIR22-6

Cat. no.	Description	Pkg. qty.
PAIR22-6	Open yoke, hand-actuated air crimp tool	1
Crimp dies*		
DIE2001	Insulated #22–#10 AWG Sta-Kon terminals	1
DIE2002	Non-Insulated #22–#10 AWG Sta-Kon terminals	1
DIE2005	Non-insulated #16–#10/#8–#6 Sta-Kon terminals (tubular only)	1
DIE2007	Insulated #8–#6 AWG Sta-Kon terminals (tubular only)	1

* Dies sold separately.
Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.
Note: Battery-powered tools BPI42300CR, BPLT6BSCR and BPLT62BSCR can also be used to crimp non-insulated Sta-Kon terminals.

Application tools

Bench-mounted air tools

BAIR22-6 Bench-mounted air tool

Crimps #22–#6 AWG terminals.

- 1.8 tons output force at 100 psi
- Bench-mounted heavy-duty air tool
- Short cycle time
- Shure-Stake mechanism
- Foot actuated
- Accepts ABB standard hand tool dies
- Installs Sta-Kon and Spec-Kon terminals, as well as ferrules and Dragon Tooth connectors

Cat. no.	Description	Pkg. qty.
BAIR22-6	Heavy-duty, high-speed production tool installs a wide range of Sta-Kon terminals, from #26–#6 AWG; uses the DIE2000 series dies for both non-insulated and insulated terminals; supplied complete with foot pedal, air hose/air lubricator	1
Crimp dies*		
DIE2001	Insulated #22–#10 AWG Sta-Kon terminals	1
DIE2002	Non-Insulated #22–#10 AWG Sta-Kon terminals	1
DIE2005	Non-Insulated #16–#10/#8–#6 Sta-Kon terminals (tubular only)	1
DIE2007	Insulated #8–#6 AWG Sta-Kon terminals (tubular only)	1

* Dies sold separately.

Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.

Note: Battery-powered tools BPI42300CR, BPLT6BSCR and BPLT62BSCR can also be used to crimp non-insulated Sta-Kon terminals.

Crimps #8 AWG–250 kcmil.

Convenience and economy

The tool accepts a full range of interchangeable dies, the same as used in the TBM6 or TBM6S tools. To install the dies, simply pull the spring-loaded pin and remove the indenter die. Then, flex the retaining spring and remove the die nest.

Shure-Stake mechanism means quality connections

The Shure-Stake mechanism senses inlet air pressure, and if insufficient, is designed to prevent the tool from cycling. Thus you avoid “under-crimping.” An 85–90-psi air pressure source is required.

Safety features increase productivity, reduce downtime

Safety features include a guard over the die area, an air shutdown switch activated by a slight push with the finger and a foot pedal that’s enclosed to prevent accidental tool operation. In addition, the tool may be bench-mounted for stability and control. For convenience when crimping large size terminals on heavy wire, the head assembly may overhang the workbench.

Air-operated bench-mounted tool

Cat. no.	Description	Pkg. qty.
25000	This compact heavy-duty air tool installs nylon insulated Sta-Kon terminals on wire sizes from #8 AWG to 250 kcmil; non-insulated styles are also installed just as quickly and dependably; heavy-duty air tool installs non-insulated and insulated Sta-Kon terminals from #8 AWG to 250 kcmil	1

Note: This tool uses the same dies as the TBM6 and TBM6S hand tools on page B60.

Installs insulated and non-insulated Sta-Kon terminals!

12-Ton hydraulic head

Cat. no.	Description	Pkg. qty.
13400	12-ton crimping tool supplied with adapter TBM12D-AR; used for installing both insulated and non-insulated Sta-Kon terminals #8 AWG to 250 kcmil (dies ordered separately)	1

Military listed and 12 tons of crimping power.

12-Ton crimping tool (military spec. MS25441-1)

Cat. no.	Description	Pkg. qty.
13642M	Hydraulic-operated 12-ton tool; installs #8 AWG to 250 kcmil Sta-Kon terminals (dies ordered separately)	1

Application tools

Hydraulic pumps

- Designed for use with single-acting cylinders and tools rated for 10,000-psi operation
- Supplied with metal carrying case
- 13620 hand switch and 13619 hydraulic hose, both sold separately, required for operation

Specifications

- Motor: ½ hp, 115 V 50–60 Hz, 10 amps
- Pumping Capacity:
 - 170 cu. in./min. at 100 psi
 - 32 cu. in./min. at 1,000 psi
 - 25 cu. in./min. at 5,000 psi
 - 18 cu. in./min. at 10,000 psi
- Reservoir volume: 104 cu. in. (0.45 gal.)
- Basic pump dimension: 6 in. x 8 in. x 16 in.
- Weight: 25 lb

13600 Electric hydraulic pump

Cat. no.	Description	Pkg. qty.
13600	Electric hydraulic pump – hand or foot switch and non-metallic hose (sold separately) required for operation	1

- Shure-Stake control mechanism requires 9,800-psi pump pressure before recycling to prevent under-crimping
- Designed for use with single-acting cylinders and tools rated for 10,000-psi operation
- Supplied with metal carrying case

Specifications

- Motor rating: ½ hp, 115 V, 50–60 Hz, 12.5 amps
- Pumping capacity:
 - 170 cu. in./min. at 100 psi
 - 32 cu. in./min. at 1,000 psi
 - 25 cu. in./min. at 5,000 psi
 - 18 cu. in./min. at 10,000 psi
- Reservoir volume: 104 cu. in. (0.45 gal.)
- Basic pump dimension: 8½ in. x 10½ in. x 16 in.
- Weight: 35 lb

13610A Electric hydraulic pump with Shure-Stake control

Cat. no.	Description	Pkg. qty.
13610A	Electric hydraulic pump with Shure-Stake control – hand or foot switch and non-metallic hose (sold separately) required for operation	1

Application tools

Hydraulic pumps

- Designed for perfect crimps every time in heavy-duty OEM applications
- Heavy-duty OEM two-stage pump with high flow rate
- Shure-Stake control mechanism requires 9,800-psi pump pressure before recycling to prevent under-crimping
- Requires hand or foot control (sold separately)

Specifications

- Motor rating: 1½ hp, 115 V, 60 Hz, 23 amps
- Pumping capacity:
235 cu.in./min. at 200 psi
6 cu.in./min. at 8,000 psi
- Reservoir volume: 462 cu.in./2 gal.
- Dimensions (L x W x H): 10¾ in. x 15 in. x 20¾ in.
- Weight: 60 lb

13810 Heavy-duty electric hydraulic pump with Shure-Stake control

Cat. no.	Description	Pkg. qty.
13810	Heavy-duty electric hydraulic pump with Shure-Stake control – hand or foot switch and non-metallic hose (sold separately) required for operation	1

Accessories for electric hydraulic pumps

Cat. no.	Description	Pkg. qty.
For 13600		
13620	Hand switch	1
13589A	Foot switch	1
13619	10-ft. Non-metallic hose	1
13618	20-ft. Non-metallic hose	1
13600S	“Sled” type stand for 13600 pump	1
For 13610A and 13810		
13611	Hand switch	1
13612	Foot switch	1
13619	10-ft. Non-metallic hose	1

Catamount terminals

Catamount terminals – now in convenient, spillproof, re-usable packaging.

While poly bags keep their contents dry, they don't offer much other protection, and they aren't environmentally friendly. That's why Catamount terminals now come in sturdy plastic containers that safeguard the connectors inside against crushing and can be re-used or recycled when empty. ABB is always adding value to its products. With the introduction of a durable plastic container, the value of ABB's Catamount terminals has been significantly enhanced. No more lost or spilled terminals because of inadequate packaging.

-
- 02 WT112M
-
- 03 ERG1-WS
-
- 04 CM2000A
-
- 05 TBM6S

Cat. no.	Description	Pkg. qty.
WT111M	Plier tool with cutter for 22–10 AWG non-insulated terminals	1
WT112M	Pier tool with cutter for 22–10 AWG insulated and non-insulated terminals, splices and disconnects	1
TBM6S	Toggle-type hand tool with Shure-Stake for 8–6 AWG, vinyl-insulated terminals (dies sold separately)	1
ERG1-WS	Ergonomic wire stripping tool	1
CM2000A	10 in. ratchet crimping tool for insulated terminals (22–10 AWG)	1

Tools

- Ergonomic ratchet-style hand tools used for installing insulated and non-insulated terminals
- Specially designed ergonomic handles distribute the crimping force more evenly across the user's hands, helping to reduce the risk of carpal tunnel syndrome, the cause of almost one in two industrial injuries
- Ratchet design greatly reduces handle forces over conventional hand tools and incorporates the Shure-Stake mechanism, which ensures a full crimp cycle every time
- Most dies incorporate wire range marking for easy inspection (insulated only)
- Colour-coded die nests (insulated only) make terminal and die nest selection easy
- The product design and engineering results in a long lasting precision tool
- Exists in 2 versions: with interchangeable dies or with fixed dies

Toggle action increases mechanical gain, which dramatically reduces handle force – and the stress on your hands

For easy visual verification of crimps, integrity dots are embossed on the top and bottom of the terminal

Colour-coded die nests on both the right and left sides of the tool are included for insulated terminals

Advanced ergonomic design of handle distributes the force more evenly across the hand

Rubberized thermoplastic handle combines maximum friction with a soft, comfortable feel that reduces muscle tension

Shure-Stake mechanism ensures a complete crimp cycle before it releases

Product ref.: ERG2001A

Ergonomic fixed die tool, with three colour-coded die nests for easy selection.

For insulated terminals from:

- 0.5 to 1.5 mm² red
- 1.5 to 2.5 mm² blue
- 4.0 to 6.0 mm² yellow

Shure-Stake mechanism

Length: 255 mm

Weight: 560 g

Product ref.: ERG2510

Ergonomic fixed die tool with 2 die nests.

For insulated terminals and insulated bootlace ferrules from:

- 0.25 to 0.5 mm²
- 0.5 to 1.0 mm²

Shure-Stake mechanism

Length: 220 mm

Weight: 430 g

Tools

Metric crimping tools

An extensive range of tooling is available, suiting a variety of requirements, to crimp the following terminals:

- Insulated terminals and bootlace ferrules
- Non-insulated terminals
- Copper tube terminals

Different types of tooling are offered, depending on volume and application:

- Plier-type hand tools for occasional applications (“do-it-yourself” users)
- Standard hand tooling for low to medium volume applications
- Ergonomic hand tooling for low to medium volume applications, where high, repeatable quality is essential
- Hydraulic tooling for heavy-duty applications
- Smart tools where no die change is necessary

—
01 WT52

—
02 WT2124Y

Product ref.: WT52

Plier-type tool.

For insulated and non-insulated terminals from 0.5 to 6.0 mm².

Incorporates wire stripper and bolt cutters. Recommended for “do-it-yourself” applications only.

Length: 225 mm

Weight: 200 g

—
01

Product ref.: WT2124Y

Ratchet-type hand tool, fixed die.

For insulated and non-insulated terminals from:

- 0.5 to 1.5 mm² red
- 1.5 to 2.5 mm² blue
- 4.0 to 6.0 mm² yellow

Built in Shure-Stake mechanism to ensure a full compression every time.

Length: 228 mm

Weight: 533 g
