tesa®ACXplus 70740

3900 µm double-sided acrylic foam tape.

Product Description

The tesa® ACXplus 70730 series is suitable for a wide range of bonding applications. For powerful long-lasting bonds, even on material with different surface characteristics. Three thicknesses are available (2400 µm – 3900µm) and the product is ideal for mounting applications with larger gap filling requirements. As being part of the tesa® ACXplus 707x product group, tesa® ACXplus 70740 can compensate thermal elongations of bonded components with temperature cycles from -20 °C to 80 °C.

Product Features:

- Due to its thickness ideal for gap filling requirements
- Compensation of thermal elongation of different materials

Application Fields:

Exemplary mounting applications in different industries (e.g. windows & doors, elevator, transportation, appliances, interior fit-out) include:

- Partition Wall (glass-to-glass)

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

Backing material **foamed acrylic**
Type of adhesive **pure acrylic**
Total thickness **3900 µm**
Color **black**

Adhesion to Values

Steel (after 3 days) **38 N/cm**
