φ30 Series

Conversion Manual for Selector Switches

(For converting old part numbers to new part numbers)

IDEC CORPORATION

— Content —

	Page
● About this manual	2
● Notes for replacing old products with new products Please refer to the catalogues for product specifications	2
● Comparison of part numbers and contact configurations	
■ ϕ 30 Series Selector Switches	
•ASN Selector Switches (Knob Operator)	3 - 4
•ASN□L Selector Switches (Lever Operator)	5 - 6
•ASN□K Key Selector Switches	7 - 8
•ASN-T Selector Switches (Knob Operator, Twin Rod Type)	9 - 10
•ASN□L-T Selector Switches (Lever Operator, Twin Rod Type)	9 - 10
•ASN□K-T Key Selector Switches (Twin Rod Type)	11 - 12
•ASTN Selector Switches (Knob Operator)	13 - 14
•ASTN□L Selector Switches (Lever Operator)	15 - 16
•ASTN□K Key Selector Switches	17 - 18
•ABN6/7/9 Selector Pushbuttons	19 - 20
● Table for the change of part number	21 - 22
● Appearance of new ASN switches	

● About this manual

Old product part numbers are on the left-hand page; the replacements – new product part numbers are on the corresponding position of the right-hand page. Please refer to the catalogue for the product specifications, contact ratings and other details.

● Notes for replacing old products with new products

Please check whether the switching action and wiring positions of old and new products are the same.

e.g. 90° 2-position (please refer to p.3, p.4)

The replacement for old part number "ASN310" is "ASN210N". The switching action and wiring positions are the same.

(p.3, left-hand page)

(p.4, right-hand page)

Contact Configuration chart					Maintained
Contact Configuration	Contact Block		Operator Position		
	Mounting Position	Contact	L	R	
1NO	1	NO		●	 ASN310
	2	—	—		

(p.17, Right-hand page)

Contact Configuration chart					Maintained 
Contact Configuration	Contact Block		Operator Position		
	Mounting Position	Contact	L	R	
1NO	1	NO		●	ASN210N
	2	—	dummy block		

For some of the products, the following differences are found between old and new products.

a) The wiring positions of some new products are different from that of old products.

Please be sure to check the switching action and wiring positions of the new selector switches before wiring.

e.g. The wiring positions of old product (ASN17S) and its replacement (ASN302N) are reversed.

2NC	1	NC	●		ASN17S
	2	NC		●	
2NC	1	NC		●	a) ASN302N
	2	NC	●		

b) The contact configuration is different between some old and new products, although the switching action is the same.

Please be sure to check the contact configuration and contact block mounting positions of the new selector switches before wiring.

e.g. The contact block mounted on position 2 is different between the old product (ASN111) and its replacement (ASN320N).

1NO-1NC	1	NO	●		ASN111
	2	NC		●	
2NO	1	NO	●		b) ASN320N
	2	NO		●	

Please note that  and  indicates the contact is closed.

Contact Block Mounting Position

Old Product

New Product

Please be careful when replacing old products with new products

Some new products have similar part numbers as old products, but their specifications are different.

Example 1: ASN320 and ASN320N (please refer to p.3, p.4)

• ASN320 (90°, 2-position, Knob Operator) - Old Product

Contact Configuration chart					Maintained 
Contact Configuration	Contact Block		Operator Position		
	Mounting Position	Contact	L	R	
2NO	1	NO		●	ASN320
	2	NO	●		

• ASN320N (45°, 3-position, Knob Operator) - New Product

Contact Configuration chart						Maintained
Contact Configuration	Contact Block		Operator Position			
	Mounting Position	Contact	L	C	R	
	2NO	1	NO	●		
2		NO			●	

b) ASN320N

- Others similar part numbers

• ASN3L20 and ASN3L20N

• ASN3K20 and ASN3K20N

Example 2: ASN211 and ASN211N (please refer to p.3, p.4)

• ASN211 (45°, 3-position, Spring Return from Left, Knob Operator) - Old Product

Contact Configuration chart						Spring Return from Left 
Contact Configuration	Contact Block		Operator Position			
	Mounting Position	Contact	L	C	R	
1NO-1NC	1	NO	●			ASN211
	2	NC			●	

• ASN211N (90°, 2-position, Maintained, Knob Operator) - New Product

Contact Configuration chart					Maintained 
Contact Configuration	Contact Block		Operator Position		
	Mounting Position	Contact	L	R	
1NO-1NC	1	NO		●	ASN211N
	2	NC	●		

- Others similar part numbers

• ASN2L11 and ASN2L11N

• ASN2K11 and ASN2K11N

● Part number development chart of new ASN series selector switches

It is easier to identify the specification of the switches, such as number of operation position and handle operation, as it uses the same part number system as φ22 TW series and φ25 TWS series.

ASN 2 22 N - 103

a) The wiring positions of new products are different from that of old products.

Please be sure to check the switching action and wiring positions of the new selector switches before wiring.

b) The contact configuration is different between the old and new product, although the switching action is the same.

Please be sure to check the contact configuration and contact block mounting positions of the new selector switches before wiring.

Contact Block Mounting Position

* Key removal position code: please put the same key removal position code as that of old product

Note 1: The wiring positions of new products are different from that of old products.

Please be sure to check the switching action and wiring positions of the new selector switches before wiring.

Note 2: The contact configuration is different between the old and new product, although the switching action is the same.

Please be sure to check the contact configuration and contact block mounting positions of the new selector switches before wiring.

Note 3: New selector switches will have same selector handle as that of diecast zinc series.

The new handle can be removed and be installed in positions other than the standard position at 45° interval.
