Information about this article

Description of clamping lever with internal thread: The adjustable grip is made from unalloyed C15 steel (grade 5.8). The highly robust steel grips easily stand up to higher forces during opening and closing. The handy grip on the clamping lever is matt powder-coated and available as standard in red or black. The matt coating ensures effective light absorption without glare. The following clamping lever thread sizes are available ex stock and can be conveniently ordered online: - M5- M6- M8- M10- M12- M16 Clamping levers with external thread are easy to
