## Highlights

### Thunderbolt™ 4 monitor

This Philips docking monitor is equipped with Thunderbolt™ 4 connection. Compared with conventional USB-C monitors, Thunderbolt™ 4 technology provides lightning-fast 40Gbps data transfer speeds, supports high resolution video, offers multi-stream transport for daisy chaining, has up to 90W of power delivery to external devices, and can provide a stable 1Gbit/s Ethernet connection.

### Thunderbolt daisy chain setup

Daisy chaining allows you to drive multiple monitors and devices from a single Thunderbolt port on your laptop. From the Thunderbolt port of your laptop connect to this monitor, then from the second Thunderbolt port on this monitor you can connect to a second 4K monitor.

### IPS technology

IPS displays use an advanced technology which gives you extra wide viewing angles of 178/178 degree, making it possible to view the display from almost any angle. Unlike standard TN panels, IPS displays gives you remarkably crisp images with vivid colors, making it ideal not only for Photos, movies and web browsing, but also

for professional applications which demand color accuracy and consistent brightness at all times.

### UltraWide 5K2K

With UltraWide 5K2K resolution, the color depth is delivered more vividly and the fine details of the visual are never to be missed. Productivity is redefined thanks to the additional screen space.

### Calman Ready

This new technology allows for screen calibration to be done at a fraction of the traditional time it takes without skimping on a beautiful and aesthetically pleasing color gamut. In contrast to manual calibration, monitors equipped with the Calman Ready feature will calibrate automatically. In turn, this automation produces vibrant colors that produce so-called "Hollywood-grade color" and is most suited for professions that demand accurate coloring.

### Pop-up webcam

Philips' innovative and secure webcam pops up when you need it and securely tucks back into the monitor when you are not using it. The webcam is also equipped with advanced sensors for Windows Hello facial recognition, which

conveniently logs you into your Windows devices in less than 2 seconds, 3 times faster than a password.

### eyesafe® CERTIFIED 2.0 (RPF 50)

The Philips display meets the eyesafe® CERTIFIED 2.0 standard to truly protect you from the long exposure to blue light. The always-on blue light filter not only helps reduce digital eye strain, but also guarantees color integrity.

### MultiClient Integrated KVM

With MultiClient Integrated KVM switch, you can control two separate PCs with one monitor-keyboard-mouse set up. A convenient button allows you to quickly switch between sources. Handy with set-ups that require dual PC computing power or sharing one large monitor to show two different PCs.

### Windows Hello Compatible

Log in faster and more securely with Windows Hello. The webcam on this Philips monitor is compatible with Windows Hello, offering quick facial recognition and effortless access - every time you power on.

# Highlights

### Webcam & noise cancelling mic

This Philips monitor comes with a built-in 5MP webcam, noise-cancelling microphone, and speakers, making it perfect for working from home and collaborating remotely. It is equipped with advanced sensors that work seamlessly with Windows Hello facial recognition, allowing you to log into your Windows devices in less than 2 seconds. For added privacy, a physical camera switch lets you disable the webcam when not in

use. The noise-cancelling microphone and dual 5-watt integrated speakers ensure clear communication.

### PowerSensor

PowerSensor is a built-in 'people sensor' that transmits and receives harmless infrared signals to determine if user is present and automatically reduces monitor brightness when user steps away from the desk, cutting energy costs by up to 80 percent and prolonging monitor life

### Earphone hook

The unique design of headphone hook on the side of the Philips monitor brings the tidiness and cable management of your working station to the next level. The easy access of it lets you put aside your headphone easily, making sure that all the accessory you need is within reach.
