Introduction

Product Facts

- High density packaging features
- Minimum mass
- MIL spec or Commercial-Off-The-Shelf (COTS) options
- Durable performance, rugged
- Outstanding electrical performance; low contact resistance
- Withstands shock and vibration
- Expanded temperature range
- Reliable mass crimp terminations
- Crimp any material, shape, finish
- Extensive design options
- Other options:
 - EMI/RFI filter
 - SMT or thru-hole
 - Harness assemblies
 - Mounting brackets
 - Custom modifications
 - Backshells
 - Lo-profile
 - Headers
 - Flex circuit attached
 - Mixed signal technology

NANONICS Nanominiature Connectors and associated cable systems are designed for size and weight reduction while maintaining a high level of reliability and ruggedness. The contact system is used throughout the product family to enhance long-term performance and quality of the system in difficult applications. Connector manufacturing utilizes only materials that are selected to pass Space and Military Specifications. Fabrication of the connectors includes machine controlled crimping of the leads or wires directly to the pin or socket contacts prior to final connector assembly. These high-end Nanominiature connectors are designed into numerous configurations that range from wired nano-strips to complex flex circuit interconnect systems and cover the circuit spectrum from dc. to rf. applications. Customized versions of each design type can be requested. Application Engineering and custom harness designs are available to help resolve fitting previously large interconnection systems into smaller and smaller spaces.

General Specifications

Military — meets * DSCC specs. 94031 through 94046

Goldbore Contacts

Material — Beryllium copper

Plating — Nickel over gold

Contact Current — 4 Amps continuous

Resistance — .003-.008 ohms

Engage Force — 1.0 oz. average/contact

Wire size/Current — 30 AWG & smaller/1 Amp

Contact Pitch — .025 [.635], .0125 [.317] for 2 row

Insulators — Polyphenylene sulfide or liquid crystal polymer

Metal Shells — 6061 Aluminum with electroless nickel plate; 303 stainless steel; other metals & plating available

Dielectric WV — Sea level 70,000 ft. [21,336 m]

Plastic	500VDC	250VDC
Metal	400VDC	200VDC

Insulation Resistance — 1000 Megohms

Vibration & Shock — * DSCC 94031 - 94046 & MIL-C-83513

Environment — * DSCC 94031 - 94046 & MIL-C-83513 (Tested over 4000 engagements)

Polarization — DUALOBE, pins, keys

Temperature Range — -328° F to +437° F [-200° C to +225° C]

Layouts — 2-65 positions

Coupling — Jackscrews; friction

Outgassing — Meets Sp-R-0022

* DSCC-Defense Supply Center, Columbus. Formerly, DESC, Dayton, Ohio

Introduction (Continued)

Strip

- Smallest of connectors
- Friction coupling
- Guide pin polarization
- SMT, or thru-hole
- Wire, flex and ribbon options

DUALLOBE Connector

- Polarized scoop-proof mating
- Blindmating with ease
- Coupling with jackscrews
- Panel mount, SMT, thru-hole
- MIL Specs or COTS

Hermetic "H" Series

- Hermetic per MIL-STD-202
- MIL-STD-883; 1X10-8 CC/sec leak rate
- 5-60 positions, larger sizes as assemblies
- Mate with NANONICS standard DUALLOBE receptacles

Nano-Coaxial Connectors

- More than 1/3 smaller than Micro-Ds
- Custom mixed signal systems
- Uses 32 AWG coax
- Maintains low cross talk
- Improved analog signal control

Environmentally Sealed Circulars

- Quick Disconnect or Thread Coupling Plugs
- Panel Mount and Flush Mount Receptacles
- Sizes include: 7, 19 and 44 position
- Nano-Sized Shells and .025 [0.635] pitch connections

The Contact System

The contact system features burnished gold bores and surfaces throughout the tubular pins and sockets. The one-piece seamless contacts are fabricated using techniques that result in superior, gold finish contacts.

Tyco Electronics provides a typical gold thickness of 30 micro-inches (.000030 [0.00076]). In addition, seamless contact bores further contribute to crimps of outstanding quality and durability (i.e., gas tight and intrusion proof). Innovative receptacle design effectively doubles the electrical "creep" distance between sockets permitting higher voltage limits. The contact system also minimizes bias to resonate, thus, vibration and shock induced "opens" are virtually eliminated.

Excellent physical and electrical mating characteristics are obtained via a low engaging force that maintains an effective contact wiping action during mating. Problems associated with special mating tools or jigs and zero force engaging techniques (i.e., ZIF) are eliminated.

Socket Contact

The socket is the active element. It incorporates the necessary spring action to promote low contact resistance and long life endurance. The socket is a seamless one piece tubular part without slots or other traditional means to provide the spring action. Precision manufacturing techniques produce a highly reliable and simple contact. A unique burnished Goldbore finish is common to the crimp barrels of both contacts and the socket engaging bore. The gold finish provides contact integrity for superior reliability and environmental performance.

Pin Contact

The pin contact is fabricated employing ultra precision methods producing a blind-bore seamless pin

with a burnished gold finish on ID and OD surfaces. The pin, being approximately .0125 [0.32] in diameter, is not as strong as the socket. Consequently, the pin has been recessed within the insulator, thereby permitting the stronger member (the socket) to be exposed.

Termination

Connectors are normally terminated at the factory per specifications. Thus, no special techniques or termination tools are required by the customer. Tyco Electronics can also provide factory terminated harness assemblies (including flex circuits) to your specifications. All terminated connectors and harness assemblies are tested and certified prior to shipment. Both contacts embody closed crimp bores that provide the optimum shape for a variety of conductor shapes and materials, including 30 AWG thru 40 and smaller.

Crimp termination accommodates solid and stranded conductors as well as flat conductors and ribbon cable. Crimps are gas-tight and intrusion proof.

Contact Configuration

Strip Connectors

NANONICS Strip Connectors provide dramatic reduction in size and weight, and enable reduction in board space requirements while retaining DUALOBE Connector series performance.

Strips are useful in applications such as hearing aids, hand-held communication devices, flex terminations, and high density electronics where packaging space is at a premium.

Strips are available for PCB surface mount and thru-hole applications and may be terminated with ribbon cable, flex circuits and a variety of insulated wire, 30 AWG thru 42 AWG and smaller. Contact Tyco Electronics for details.

Polarization

Polarization of the strips is accomplished with the use of polarizing guide posts.

Circular Nanominiature Connectors .025 [0.64] Pitch

NANONICS N-Series circulars are one of the industry's smallest, reliable, circular nanominiature connectors.

Design and manufacturing focus is aimed directly at:

- High Density
- Reduced Weight
- Reduced Diameter
- High Reliability

This family of in-line circulars is available in pin counts of 7, 19 and 44 positions. Outside diameters range from .300 [7.62] OD. to .530 [13.46] OD.

The connector contact system features burnished gold bores and surfaces through the tubular pins and sockets.

One-piece seamless contacts are used to increase contact area and current carrying capability while reducing effects from vibration, shock and thermal excursions.

NANONICS circular connectors are offered with a wide variety of wire and cable terminations. Leads can be left pigtailed for convenient attachment into pc boards, systems and sensors. Connectors of any type available can be included in the harness design and manufacturing process at Tyco Electronics. Additional panel mounting configurations can be made available.

Specifications

Metal Shell — Aluminum 6061

Plating — Nickel/Gold

Insulator — Liquid crystal polymer

Contacts — Beryllium copper, Nickel over gold plated

Resistance — .003-.008 Ohm

Threaded Coupling Nut Action

Temperature Rated —
482° F [250° C]

NCG007 — 7 Position Circular

NCG019 — 19 Position Circular

NCG044 — 44 Position Circular

Nanominiature

.025 [0.64] Contact Pitch

**19 Position Quick Disconnect
Flush Mount Receptacle
and Plug**

- Environmental seal
- EMI/RFI seal
- Contact system exceeds MIL-C-83513
- Also available in 7 and 44 positions
- "O" rings for environmental seal

Specifications

Connector Body — 6061-T6 Aluminum

Plating — Nickel per MIL-C-26074

Insulator — Liquid crystal polymer

Contact Current — 4 amps continuous

Contact Resistance — .003-.008 Ohm

Contact Mating Force — 1.0 oz. avg./contact

Wire Size — 30 AWG stranded or smaller

Wire Current — 1 amp max. (30 AWG)

Coupling — Push-pull quick disconnect

Mated Length —

.705 [17.91] (without strain relief)

1.71 [43.43] (with strain relief sizes 7, 19)

2.21 [56.13] (with strain relief size 44)

No. of Positions	Receptacle A Dim.	Plug B Dim.
7	.312 7.92	.250 6.35
19	.375 9.53	.300 7.62
44	.500 12.70	.395 10.03

(Shown with Optional Strain Relief)

19 Position Flush Mount Receptacle (Shown)

19 Position Plug (Without Strain Relief) (Shown)

Environmentally Sealed Threaded Coupling Circular Connectors

50 Ohm Coaxial Connector System

Options

- Mixed signal option;
five signal leads and shell
with coax
- Up to 9 coax connections
per shell
- Horizontal surface mount
receptacle also available

Mechanical Specifications

Receptacle Contact Outside

Diameter — .075 [1.91]

Mated Contact Pair Length —

.322 [8.19]

Mated Shells Height —

.166 [4.22]

Mated Shells Width —

.535 [13.59]

Mated Shells Length With Back

Potting — .511 [12.98]

Product Specifications

Main Connector — 6061 Aluminum
nickel plated, liquid crystal polymer
insulator

Outer Contact — Beryllium copper,
gold/nickel plated

Inner Coax Contact — Beryllium
copper, gold/nickel plated

Coax Insulator — TEFLON

Back Potting — Space quality epoxy

Wire Size — 30 AWG to 38 AWG

Environmental Rating —

Meets MIL-C-83513

Operating Temperature —

-67°F to 311°F [-55°C to 155°C]

Electrical Specifications

Impedance — 50 Ohm

Frequency Range — 0 – 20 GHz

Working Voltage — 100 v

Dielectric Withstanding — 300 Vrms

@ Sea Level

Note: Insertion Loss of 30 AWG Coax
Cable @ (50 Ohm) is approximately
1.0db/ft. @ 3 GHz. The connector system
with 6" of coax on each side, is better than
1.5db @ 3 GHz.

.025 [0.64] Contact Pitch

- Environmentally sealed
- 3000 PSI performance
- RFI/EMI protected
- Vibration and Shock DSCC 94031-94046 MIL-C-83513
- Terminate with wire, flex circuit, and ribbon cable
- Interface with NANONICS standard DUALOBE connectors

NANONICS nanominiature environmental connectors provide reliability and high density packaging solutions in harsh environmental conditions.

These connectors offer a variety of terminations including one or two rows, plastic or metal shrouds, vertical, horizontal, or panel mount.

Typical

**Size 51, 2 Row, DUALOBE Connectors
Environmental Series,
Receptacle Assembly**

Tyco Electronics

Hermetic Connectors

"H Series" Nanominiature (.025 [0.64] pitch)

- Hermetic per MIL-STD-202
- Meets MIL-STD 883C, 1-10-8CC He/s max. leak rate
- Solder/Braze KOVAR bodies
- Laser weldable 4047 aluminum flange
- Seamless spring socket
- One or two contact rows
- Low engaging forces (1.0 oz) minimize stress
- High performance contact system
- Contact Tyco Electronics for detailed information

The "H Series" Hermetics bring together established hermetic manufacturing capabilities and our Nanominiature contact and connector design.

The NANONICS "H Series" connectors offer a hermetically glass sealed receptacle per MIL-STD-202 in all sizes. They can be laser welded (aluminum, stainless steel) or soldered/brazed (Kovar). The hermetic receptacles intermate with NANONICS standard line of DUALOBE plugs.

The connectors are designed for MIL class reliability in harsh environments and for dense packaging and reduced size and weight.

Mating DUALOBE plugs offer a variety of terminations and feature one or two rows, plastic or metal shrouds, vertical, horizontal, or panel mount. The contact system features one-piece, seamless, spring socket and gold plated KOVAR pins.

Single Row, 25 Pin

Two Row, Glass Seal, Receptacle

Tyco Electronics

Filtered Connectors

10 MHz - 6+ GHz
Size 30 Contacts — .025
[0.64]/.0125 [0.32] Pitch

- EMI/RFI filter options for nanominiature connectors
- 30 microinches of pore-free Goldbore burnished gold on all internal and external contact and crimp surfaces;
 - Low resistance of .003-.008 ohms
 - 4000+ engagement cycles
 - High performance contact system
- Gas-tight mass crimp;
 - termination reliability
 - enables ribbon, flex circuits
- Reliable, seamless contacts
- Temperature, -67°F to 257°F [-55°C to +125°C]
- Increased voltage limits
- Low engaging forces (1.0 oz)
- MIL-C-83513 performance
- Stocked sizes 9, 15, 25, 37, 51 and 65
- Standard sizes available, 5 thru 65 contacts in increments of 1 (1 row) or 2 (2 row)

Filtered connectors are designed for MIL class, high reliability in harsh environments, and for dense packaging requirements. Small size and weight (0.5 gr avg.) are featured benefits of filtered connectors making them highly suitable for high-density circuit designs. The filter options are available in PI, L, or C configurations and have a range from 10MHz to over 6.0GHz.

PCB Mount, 51 Position With Filters

PCB connectors with filters (SM or thru-hole) are configured within shrouded DUALOBE connectors versions. Filters are housed within the connector body. The DUALOBE connectors series features one or two rows, with plastic or metal shrouds, vertical, horizontal, or panel mount. Filters may be specified for either plugs or receptacles.

All configurations incorporate an innovative high performance rated contact system on .025 [0.64] centers.

The contact/filter system features a one-piece, seamless, spring socket design that improves connector reliability and performance in harsh environments.

Tyco Electronics

Proprietary crimp technology helps eliminate solder terminations and related problems

- Mass Crimps exceed requirements of MIL-C-39029 and terminate any material, any shape, any finish, 28 AWG or larger
- Connectors meet DSCC* specifications 94031-94046 for Nanominiature connectors, and the performance requirements of MIL-C-83513
- The contact system features a one-piece, seamless, spring socket and pin design enhancing environmental performance
- New thresholds of performance have been established via the Goldbore contact and proprietary crimp terminations, i.e.:
 - Low resistance of .003-.008 ohms
 - High performance contact system
 - MIL spec quality mass crimp
 - Seamless contacts
 - MIL spec performance
 - DSCC* spec qualified
 - Increased voltage limits via insulator design
 - Low engaging forces
- Stocked sizes: 9, 15, 25, 37, 51 and 65
- Standard sizes: 5-65 positions

Tyco Electronics offers a wide range of nanominiature connectors for flex circuit and ribbon cable.

Designed for mass crimp termination to .025 [0.64] and .0125 [0.42] pitch flat/ribbon cable and flex circuits, connectors feature

MIL class reliability in harsh environments, and dense packaging capability (1/4 of microminiature size) and reduced weight — 0.5 grams avg.). The 2-row DUALLOBE connector provides an effective termination pitch of .0125 [0.42].

Available as strips or shrouded DUALLOBE connectors feature one or two rows, vertical, horizontal, surface mount, thru-hole, and panel mount options.

Blindmate Connectors

Blindmating Board to Board, or Flex Circuit to Board with Metal DUALOBE Connectors

- Mounted vertically or horizontally
- Surface Mount or Thru-Hole
- Guide pin assisted alignment
- MIL spec quality connectors
- Miniaturization of modules

Formats include horizontal board to horizontal board, and horizontal board to vertical board. Board clamping promotes contact retention, and the connectors act as standoffs to protect the spacing for components between boards.

Introduction

Product Facts

- Designed for both military and commercial applications
- Low engaging force is achieved by the manner in which Twist Pin Contacts are designed
- The metal shell and plastic shell are available with solder cup and solid or stranded wire terminations
- Mating force maximum is 10 oz. [2.78N] times the number of contacts
- Durability — No known mechanical or electrical issues detrimental to the function of the connectors after 500 cycles of mating and unmating
- Current Rating — 3 amps max per contact

MICRODOT Connectors MCK and MCD High Density Microminiature "D" Connectors described in this catalog comprise a complete connector system, which is adaptable to a numerous variety of form factors. Low engaging force is achieved by the manner in which the twist pin contacts are designed. By constructing the male contact as a breathing helical spring, electrical contact is achieved at many points around the periphery of the pin bundle rather than at a few discrete points, as in conventional pin designs. Normal twist

pin engagement force is 6 oz. [1.67N] typically and 8 oz. [2.22N] maximum. The low force twist pins exhibit an engaging force of 4 oz. [1.11N] typically and 5 oz. [1.39N] maximum. Low force twist pins are standard in MIL-PRF-83513 configurations of MCK and MCD connectors and may be supplied as an option in all other configurations.

The MCK and MCD Series of connectors featured in this catalog are designed to meet the applicable requirements of MIL-PRF-83513, for interchangeability, inter-

changeability, and performance. Designed for both military and commercial applications, the MCK's and MCD's are especially well suited for use in miniaturized airborne and space electronics, computers, and test equipment. The metal shell MCK's and plastic shell MCD's are available with solder cup, and solid or stranded wire terminations. MCK transition blocks are standard for printed circuit board mounting. Custom termination configurations for both MCK and MCD can be accommodated. Micro D's are also supplied in wired harness assemblies.

MCK/MCD/MCDM Series Metal and Plastic Shell Connectors

Technical and Performance Data

(Applicable to MCK, MCD and MCDM unless otherwise noted)

Electrical

Contacts — Pin 24 AWG twist pin, Socket 24 AWG precision machined barrel, Wire Range 24 AWG to 30 AWG solid and stranded.

Contact Resistance — (voltage drop) 25 millivolts max. at 3 amps, $77^{\circ} \pm 7.4^{\circ} \text{F}$ [$25^{\circ} \pm 3^{\circ} \text{C}$].

Current Rating — 3 amps max. per contact.

Dielectric Withstanding Voltage — Volts RMS 60 Hz at room ambient.

At sea level 600V solder pots, 800V wire terminations & transition blocks. At 70,000 ft. [21,336 m] 150V solder pots, 200V wire terminations & transition blocks.

Insulation Resistance — 5,000 megohms min. (@ 500 VDC) at ambient room temperature.

Magnetic Permeability — 2 mu max.

Mechanical

Contact Spacing — .050 [1.27mm] centers.

Contact Engagement & Separation — Standard contact engaging force is 6.0 oz. [1.67N] (8.0 oz. [2.22N] max.). Separation force is 0.5 [1.4N] oz. min.

Mating Force Maximum — Calculated as 10 oz. times the number of contacts.

Environmental

Temperature Range — -67°F to 257°F [-55°C to $+125^{\circ} \text{C}$] for MCK/MCD, -67°F to 302°F [-55°C to $+150^{\circ} \text{C}$] for MCDM.

Vibration — No discontinuity in excess of 1 μ sec. when tested in accordance with MIL-STD-1344, Method 2005, test Condition IV.

Solderability — Connectors shall pass the test requirements of MIL-STD-202, Method 208

Shock — No discontinuity in excess of 1 μ sec. when tested in accordance with MIL-STD-1344, Method 2004, test Condition E.

Durability — No mechanical or electrical defects detrimental to the function of the connectors after 500 cycles of mating and unmating.

Humidity — After exposure to humidity as specified by MIL-STD-1344, Method 1002, Type II, IR shall be 1 megohm min. following step 7a of Method 1002 and 1000 megohms min. after 24 hours of conditioning per Method 1002.

Salt Spray — Connectors shall meet the performance requirements of contact resistance, mating and unmating forces, and contact retention after being subjected to the 48-hour 5% solution salt spray test per MIL-STD-1344, Method 1001, Condition B.

Fluid Immersion — Unmated connectors after being fully immersed in one of the following fluids, for the prescribed time, will mate at a force of 10 oz. [2.78N] times the number of contacts or less: Perchloroethylene, 2 hours; Lubricating oil per MIL-L-23699, 20 hours.

Insert Retention — Inserts will withstand a 50 lb. [34N/cm²] per square inch load in either direction.

Crimp Termination Tensile Strength — (Unassembled contacts with crimped stranded wire terminations) Wires will not pull out of contacts when the following axial loads are applied: 24 AWG, 5 lbs. [22.24N]; 26 AWG, 4 lbs. [17.79N]; 28 AWG, 3 lbs. [13.34N]

Outgassing — When tested in accordance with SP-R-0022, Total Mass Loss (TML) shall be less than 1.0% and Volatile Condensable Material (VCM) shall be less than 0.1% of the original specimen.

Materials and Finishes

Contacts — Copper alloy plated with .000050 [.00127] gold over copper flash per MIL-G-45204 Type II.

Hardware — see pages 5041 and 5042.

MCK-Metal Shell —

Insulator — RYTON R4, Polyphenylene Sulfide per MIL-M-24519
Interfacial Seal — Fluorosilicone Rubber per MIL-R-25988 (socket side only)
Body Shell — Aluminum alloy-high grade plated
Cadmium per QQ-P-416
Nickel, electroless per AMS 2404

Transition Block Shell —

RYTON R4, Polyphenylene Sulfide per MIL-M-24519
Potting Material — Epoxy, Black

MCD-Plastic Shell —

Insulator/Body — Polyester, glass filled per MIL-M-24519, Polyphenylene Sulfide per MIL-M-24519

Wire Terminations —

Solid copper per QQ-W-343 gold plated per MIL-G-45204
Stranded TEFLON insulated per MIL-W-16878
Stranded TEFLON insulated per MIL-W-22759/11, /33
Solid copper per QQ-W-343, solder dipped (Transition block)

MCDM-Metal Shell —

Insulator — Diallyl Phthalate per MIL-M-14, Type SDG-F
Body Shell — Aluminum alloy— high grade, nickel plated

Twist Pin, Pin and Socket Contacts

The contact spring member normally found in socket contacts has been eliminated by creating a breathing helical spring principle on the pin contact — smaller, more durable contacts can be manufactured economically.

Wire range 24-36 AWG solid & stranded.

MIL-PRF-83513 — Only the descriptive legend in bold italic is applicable to current MIL-PRF-83513 configurations; MIL-PRF-83513/1 through /4 — MCK metal shell; MIL-PRF-83513/6 through /9 — MCD plastic shell.

In addition, MIL-PRF-83513 solid copper wire termination is specified 25 AWG, 0.5; and 1.0 [25.4] lengths only and stranded insulated wire termination is specified 26 AWG, 18.0 [457.2] and 36.0 [914.4] lead lengths only. Hardware for MIL-PRF-83513 configurations is specified separately by the M83513/5-XX designation. M83513/1 through /4 and /6 through /9 specify no hardware (B). Mounting/mating hardware is shown on pages 5041 and 5042 with the applicable military nomenclature. The MICRODOT catalog part number for a MIL-PRF-83513 configuration may be constructed to include the desired hardware.

See pages 5058-5062 for M83513/ cross reference.

How To Specify MCK and MCD Connectors

Metal Shell

Connector Series	MCK-	C2	B	37	P	6	A	1	18.0	
Shell Finish						S — Solder pots 26 AWG max.				
						X — Special, not described by legend.				
Hardware (See Pages 5041 and 5042)						Lead Length in Inches (Min.)				
B — No Hardware						Insulation Color or Finish				
F — Float Bushing						1 — All white wire 6 — Bare (unfinished)				
K, KM — Jackscrew, Slotted Head, High Profile (9-51)						2 — All yellow wire 7 — Color coded per MIL-STD-681, System 1				
H, HM — Jackscrew, Slotted Head, High Profile (100)						3 — All gray wire 8 — Special color code				
L, LM — Jackscrew, Slotted Head, Low Profile (9-51)						4 — Gold plated 9 — 10 Solid color repeating per M-83513				
J, JM — Jackscrew, Slotted Head, Low Profile (100)						5 — Tin dipped gold plated				
Q, QM — Jackscrew, Allen Head, High Profile (9-51)						Wire Type				
T, TM — Jackscrew, Allen Head, High Profile (100)						A — Type E, 7 strand				
R, RM — Jackscrew, Allen Head, Low Profile (9-51)						B — Type ET, 7 strand				
N, NM — Jackscrew, Allen Head, Low Profile (100)						C — Type E, 19 strand				
P — Jackpost Assembly (9-51)						D — Type ET, 19 strand				
S — Jackpost Assembly (100)						F — 7 strand per MIL-W-22759/11 (28 AWG only)				
X — Lockscrew, Slotted Head						G — 19 strand per MIL-C-22759/11 (26 AWG only), 24 AWG				
Y — Lockscrew, Allen Head						L — Copper, Solid (25 AWG only)				
Z — Clip and Key (Clip Mount Only)						Q — Stranded per MIL-W-22759/33 (26 AWG only)				
Layout						Wire Size				
9, 15, 21, 25, 31, 37, 51, 100						4 — 24 AWG 5 — 25 AWG 6 — 26 AWG 8 — 28 AWG 0 — 30 AWG				
See contact arrangement										
Contact Type										
P — Pin (Plug)										
S — Socket (Receptacle)										

Plastic Shell

Connector Series	MCD	R3	B	37	P	6	A	1	18.0	
Insulator Type/Material						S — Solder pots 26 AWG max.				
						X — Special — Does not fit description below.				
Hardware (See Pages 5041 and 5042)						Lead Length in Inches (Min.)				
B — No Hardware						Insulation Color or Finish				
F — Float Bushing						1 — All white wire 6 — Bare (unfinished)				
K, KM — Jackscrew, Slotted Head, High Profile						2 — All yellow wire 7 — Color coded per MIL-STD-681, System 1				
L, LM — Jackscrew, Slotted Head, Low Profile						3 — All gray wire 8 — Special color code				
Q, QM — Jackscrew, Allen Head, High Profile						4 — Gold plated 9 — 10 Solid color repeating per M-83513				
R, RM — Jackscrew, Allen Head, Low Profile						5 — Tin dipped gold plated				
P — Jackpost Assembly						Wire Type				
X — Lockscrew, Slotted Head						A — Type E, 7 strand				
Y — Lockscrew, Allen Head						B — Type ET, 7 strand				
Z — Clip and Key (Clip Mount Only)						C — Type E, 19 strand				
						D — Type ET, 19 strand				
						F — 7 strand per MIL-W-22759/11 (28 AWG only)				
						G — 19 strand per MIL-C-22759/11 (26 AWG only), 24 AWG				
						L — Copper, Solid (25 AWG only)				
						Q — Stranded per MIL-W-22759/33 (26 AWG only)				
Layout						Wire Size				
9, 15, 21, 25, 31, 37, 51						4 — 24 AWG 5 — 25 AWG 6 — 26 AWG 8 — 28 AWG 0 — 30 AWG				
See contact arrangement										
Contact Type										
P — Pin (Plug)										
S — Socket (Receptacle)										

Note: Items in bold italic are qualified to MIL-PRF-83513.

Jackscrew Assembly
Low Profile
(R) 096-0002-0015
M83513/5-02
(RM) S96-0002-0087

Notes:

- Jackpost Assemblies will accommodate .094 [2.39] max. thickness panel.
- Letter(s) in parentheses is to assist in ordering hardware with the connector (See "How To Specify" page 5034).
- Single letters (e.g. K) designate hardware kits (2 pcs. per kit) that meets M83513/05 requirements except the material is 303 stainless steel, passivated.
- Add M suffix (e.g. KM) to designate hardware that meets all M83513/05 requirements. Material is corrosion resistant steel, non-magnetic, 125,000 PSI tensile strength minimum (Applies to jackscrews only).
- Non-MIL hardware ordered separately should be ordered in pairs; i.e. 2 pcs. P/N 096-0002-0009 per connector half.
- Items in **bold italic** are qualified to MIL-PRF-83513.

Technical & Performance Data

Performance

Contact Resistance — The average mated contact resistance is 4 milliohms, with a maximum value of 8 milliohms, using standard #24 solid copper leads when measured directly behind the crimp joints of the mated pin and socket contacts. The average resistance value at 100 microvolts is 4.8 milliohms.

Dielectric Withstanding Voltage (60 Hz rms room temperature) — 750 VAC at sea level; 200 VAC at 70,000 feet [21,336 m].

Vibration (Per MIL-STD-202C, Method 204-A, Condition D) — No discontinuity in excess of 1 microsecond during twelve 20 minute sweeps from 10 to 2,000 CPS at .06 double amplitude or 20 G forces, whichever is less.

Corrosion Resistance (Per MIL-STD-202C, Method 101B, Condition B) — Both mated and unmated samples do not exceed the

maximum allowable contact resistance (8 milliohms) when subjected to the 48 hour salt spray test.

Durability — The contact resistance after 500 mating cycles is less than the maximum allowable, 8 milliohms.

Insulation Resistance — Greater than 5,000 megohms at room temperature for the materials listed under "Materials".

Maximum Current Carrying Capacity — No. 24 contact, 3 amperes. It must be recognized, however, that all the wires to a connector will not carry their maximum current under all environmental conditions due to wire temperature.

Contact Engaging and Separation Forces — 6 oz. [1.67N] maximum (eng.); 0.5 oz. [.14N] minimum (sep.).

Temperature Range (Operating) — Diallyl phthalate -67°F to 257°F [-55°C to +125°C].

Materials

Insulator — Diallyl phthalate per MIL-M-14, Type SDG-F.

Contacts — Pin Contact: Copper alloy and beryllium copper alloy make up the complete construction. Socket Contact: Copper alloy.

Body Shell — High grade aluminum alloy.

Finishes

Contacts — Standard finish is 0.000050 [0.00127] gold over copper flash per MIL-G-45204, Type II.

Body Shell — Electroless nickel per AMS 2404.

Note: Insulators are molded into their metal shells — No bonded joint is used.

Screw Mount

The only metal shell connector that mates with all existing plastic types. This line is ideal for external use and other applications requiring frequent disconnect and remating. When durability and reliability are paramount the metal shell connector is unsurpassed — it eliminates the need for retrofitting where new metal shell varieties must mate with older plastic types.

Originally designed for military applications, they are currently used for commercial requirements, including computers.

MCDM Series Metal Shell RF COMBOMATE Connectors

Screw Mount Coaxial Terminations

Available *now* — RF Performance in standard subminiature rectangular connectors, with VSWR values of 1.01 to 1.10 in frequencies ranging in DC to 2.3 GHz. This is the COMBOMATE Connector.

This series of connectors incorporates the same metal shells and twist pin contacts used in the widely accepted, high reliability, MCDM Series.

The RF COMBOMATE Connector Series will accommodate RG 196 A/U or RG 178 B/U coaxial cable terminated in a unique, already tooled insert layouts. This feature results in savings in cost, time and space.

The RF COMBOMATE Connector Series will accommodate a maximum of 17 RG 196 A/U or RG 178 B/U cables in an area of less than .225 sq. inches [14.51 mm²]. Mixed layouts with coaxial terminations and standard AWG 24, 26 and 28 are also immediately available in 7 different shell sizes. The overall envelope and mounting dimensions of equivalent size of COMBOMATE Connectors are exactly the same as the standard MCDM Series.

Performance Data — Coaxial Terminations

Impedance — 49.0 to 51.0 Ohms.

Voltage Standing Wave Ratio (VSWR) — 1.01:1 to 1.10:1 at frequency ranging in DC to 2.3 GHz.

Dielectric Withstanding Voltage (60 Hz rms room temperature) — 750 VAC at sea level; 200 VAC at 70,000 feet [21,336 m].

Introduction

High Density Circular Connectors

Product Facts

- High density, light-weight Multi-Pin Circular Connectors feature a crimp contact retention method, requiring no insertion or removal tools
- Reverse gender available
- Ideal for harsh environment
- Sealed — Silicon rubber grommet/o-ring
- Unsealed — No grommet/o-ring
- Meets MIL Standards (high quality) but is not QPL qualified
- Ideally suited to applications where many conductors must be accommodated in a minimum of space with minimum weight
- MARC Series Connectors are non-magnetic

5

Pin and Socket Connectors

Our high density, light-weight Multi-Pin Circular Connectors are the industry's most advanced and are ideally suited to applications where many conductors must be accommodated in a minimum of space with minimum weight.

All series of connectors feature a crimp contact retention method, requiring no insertion or removal tools.

The MARC 43 Series Connectors conform to applicable performance requirements of MIL-C-26482 and has seen extensive service on many leading aerospace and ground support equipment programs.

The MARC 53 Series Connectors, designed to conform to the USAF high reliability specification MIL-C-38300, as offers high density connector performance. The positive lock coupling mechanism, combined with our exclusive floating interfacial seal, offers outstanding performance under rigorous service conditions.

The MARC 63 Series Connectors, our Bayonet Coupling Series, accommodates all insert patterns and layouts available in the MARC 43 Series Connectors, MARC 53 Series Connectors, and RMD Series Connectors. All insert assemblies are

completely interchangeable. Lighter in weight and smaller in size than any comparable connector on the market, it requires up to 50% less engagement/separation force. Conversion to bayonet coupling shell from MARC 43 Series Connectors or MARC 53 Series Connectors is done without tools by merely transferring the contacts and insert assemblies into the MARC 63 Series Connectors shell.

The newest addition to the Multi-Pin product line is the MARC 73 Series Connectors. The twist pin Circular Connector combines the lightweight, bayonet

Introduction (Continued)

coupling feature of the MARC 63 Series Connectors with the twist pin high density, center-to-center contact spacing of 0.065 [1.65] inch. The utilization of 22 AWG twist pin and socket contacts provide for 50% greater contact densities

than presently offered in the MARC 43 Series Connectors, MARC 53 Series Connectors, or MARC 63 Series Connectors.

The MQR Series is a line of circular quick disconnect connectors for rugged environmental use.

Consult Tyco Electronics for detailed information.

MARC 43 Series Connectors

General Information

A high density (.080 [2.03] contact centers), lightweight, subminiature, cylindrical connector series featuring crimp contacts and fingertip, push-pull, quick disconnect coupling. This series conforms to the applicable performance requirements of MIL-C-26482 and is available in unsealed, environmentally sealed, and hermetic types.

A large assortment in insert arrangements — accommodating AWG 12 through 32 gauge wire and miniature coaxial cables — is available for the design engineer's choice. The contacts are

retained by shoulder entrapment and can be crimped with the standard M22520 tools, using appropriate locators.

This proven series of connectors has a long history of outstanding performance

on many military and aerospace programs. MARC 43 Series Connectors are ideal for applications where high performance must be achieved at low cost.

Materials and Finishes

MARC 43 Series Connector housings and quick disconnect couplings are machined from bar stock aluminum to combine maximum strength with minimum weight. Threaded couplings are machined from non-magnetic, stainless steel bar stock for durability of the coupling threads. Contacts are manufactured from high conductivity copper alloys which have been selected for low contact resistance over the operat-

ing range of the connectors. Inserts are molded from flame-resistant, glass-filled diallyl phthalate, meeting MIL-M-14 requirements. All resilient parts are made of high temperature, silicone rubbers. Fuel resistant compounds are used where swelling affects the performance of the connector. All materials are carefully selected for their non-magnetic properties.

The standard finish is clear, non-conductive anodize on

connector housings and quick disconnect couplings. For threaded coupling applications, aluminum components are hard, black anodized, and stainless steel plug coupling is passivated with black oxide finish. Conductive finish modifications include gold, cadmium, and iridite finishes. Contacts are gold plated per MIL-G-45204 requirements. See page 5071 for modification information.

Service and Performance Data

I. Electrical — Electrical Ratings

Current Rating		Dielectric Withstanding Voltage (RMS)	Working Voltage	
Contact Size	Amperes, Max., +27°C ¹		Sea Level	70,000 ft. [21,336 m] Alt.
22 AWG	5 amps	1000	750	300
16 AWG	20 amps	1000	750	300
12 AWG	50 amps	1000	750	300
50 ohm	3 amps	1000	750	300
75 ohm	3 amps	1250	1000	300
95 ohm	3 amps	1500	1250	300

¹ Consult nomograph.

II. Mechanical — Durability: 500 Cycles Mate/Unmate.

Coupling/Uncoupling Forces and Tightening Torques:

Shell Size	Coupling/Uncoupling Force (In-Lbs.) Max.	Tightening Torque (In-Lbs.)	
		Retaining Nut	Mounting Nut
A	13 [57.8 N]	20, Max. [2.26 Nm]	30-45 [3.39 Nm – 5.08 Nm]
B	17 [75.6 N]	20, Max. [2.26 Nm]	40-55 [4.52 Nm – 6.21 Nm]
C	21 [93.4 N]	20, Max. [2.26 Nm]	55-70 [6.21 Nm – 7.91 Nm]

Operating Temperature: -85°F to 257°F [-65°C to +125°C].

Contact Size	Wire Size	Conductor Dia. (Stranded) ¹	Dielectric Dia. (Teflon)	Shield Dia.	Jacket Dia. ²
22	22, 24, 26	.019-.032 .482-.813	—	—	.039-.054 .990-1.37
16 ³	16, 18, 20	.038-.061 .965-1.55	—	—	.065-.081 1.65-2.06
12	12 AWG	.071-.093 1.80-2.36	—	—	.096-.120 2.44-3.05

¹ Tolerance of conductor diameters required for a reliable crimp. Smaller sizes readily accommodated — consult Tyco Electronics.

² Smaller jacketed cable can be accommodated but environmental seal may be impaired. Smooth extruded jacket should be used for consistent wire sealing.

³ Size 16 AWG Contact for size 20 AWG Wire — Use Tool 010-0080-0000.

MARC 43 Series Connectors (Continued)

Test Data

MARC 43 Series Connectors meet the applicable performance requirements of specification MIL-C 26482 (Navy) to include the following selected test parameters listed below:

DESCRIPTION

MIL-C-26482 Test Para

TEST REQUIREMENTS

**Insulation Resistance,
Room and High Temp.,
Para. 4.7.3**

Insulation resistance of unmated connectors shall be 5000 megohms, minimum at room temperature and 2000 megohms, minimum, at 257°F [+125°C] when measured per MIL-STD-202, Method 302, Test Condition B.

**Dielectric Withstanding Voltage,
Para. 4.7.4**

No evidence of dielectric breakdown or flashover when mated and unmated plugs are subjected to 1000 volts, rms, per MIL-STD-202, Method 301.

**Durability,
Para. 4.7.9**

Plugs and receptacles designed to withstand up to 500 cycles of engagement and separation without detrimental electrical or mechanical damage to the connectors.

**Corrosion,
Para. 4.7.10**

Unmated plugs and receptacles shall show no exposure of basis metal due to corrosion which would affect electrical or mechanical performance of the connectors after 24 hours exposure to salt spray atmosphere per MIL-STD 202, Method 101.

**Sweep Vibration,
Mated, Para. 4.7.11**

Mated connectors shall show no circuit interruptions greater than 10 micro-seconds during 12 hours vibration to include six sweeps in two axes at -67°F [-55°C], room temperature, and 257°F [+125°C] per MIL-STD-202, Method 204, Test Condition B. Post inspection shall show no detrimental cracking, breaking, or loosening of parts.

**Moisture Resistance,
Para. 4.7.13 and 4.7.13.1**

The insulation resistance of mated connectors shall exceed 100 megohms after subjection to moisture resistance testing per MIL-STD-202, Method 106.

**Contact Retention,
Para. 4.7.16**

Contacts shall withstand 15 lbs [66.7 N] axial load without axial displacement in excess of 0.012 [0.305] or damage to contacts or inserts when the axial load is applied to the mating end of the contacts in unmated plugs and receptacles at a rate of approximately 1 lb/sec.

Notes: ¹ Views shown are front face view of receptacles. Front face view of plugs is mirror image of that shown.
² Arrow (↑) indicates insert top or vertical position in relation to top or vertical position of connector housings.
³ Arrangement also available in hermetic seal receptacles.

Part Number and Ordering Information

MARC 43 Series Connectors (Continued)

MARC 43 Series Connector part numbers indicate size, shape, insert layout, type of seal, style of contact and polarization. **Note:** Pin or socket (power or coaxial) contacts may be used in either plugs or receptacles. However, it is recommended that pins be placed in the receptacle when possi-

ble to take advantage of our "scuff-proof" design. (The style—pin or socket—of a coaxial contact refers to the outer contact body.)

Alternate Keying. Standard alternate polarizing key positions are shown below. Additional polarizing keyways are available upon request.

Supplemental Accessory Hardware. We also manufacture supplemental accessory hardware (protective covers, cable clamps, etc.) to adapt these connectors to almost any application. For modifications to fit your requirements, contact Tyco Electronics.

Typical Part Number

Polarizing Key Positions

All MARC 43 Series Connector multi-pin plugs and receptacles are available in alternate polarizing positions as listed below:

(1) Arrow (↑) indicates top or vertical position (master key-keyway) and coincides with top or vertical position of insert. This relationship remains constant with alternate polarizing key positions.

¹ For threaded plug (PT) and receptacle (FT) covers, consult Tyco Electronics. Wire rope/lanyard attachments and plastic protective caps also available, consult Tyco Electronics.

Modifications

The MARC 43 Series Connector modification identification system provides alteration of standard MARC 43 Series Connectors to include special finishes, accessories, MARC 53 Series Connector housings, and custom quality assurance provisions — processing, testing, serialization, traceability. Consult your sales representative or Tyco Electronics for additional modification information.

Standard modifications include:

- (009): MARC 43 Series Connector, anodized finish — black.
- (048): MARC 43 Series Connector, iridite finish — gold.
- (056): MARC 43 Series Connector, cadmium plated — clear.
- (057): MARC 43 Series Connector including cable clamp, straight type.

- (078): MARC 43 Series Connector insert arrangement plus MARC 53 Series Connector positive lock coupling.
- (094): MARC 43 Series Connector coaxial insert arrangement to include all-crimp coaxial contacts plus MARC 53 Series Connector positive lock coupling.
- (098): MARC 43 Series Connector connector including cable clamp, right-angle type.

MARC 53 Series Connectors

General Information

The MARC 53 Series Connector family represents a major advancement in the design of high density (.080 [2.03] contact centers), sub-miniature, power and coaxial contact connectors. The MARC 53 Series Connectors consists of two connector styles — the Military approved MD53 featuring shoulder entrapped contacts, and the new RMD53 utilizing rear insertable/removable contacts.

MARC 53 Series Connectors combine positive lock — the rugged, push-pull, lock-coupling mechanism — with the unique positive seal multiple sealing system.

Positive lock is our new finger-tip, push-pull coupling with the safety lock feature, and is the only connector made with positive "blind mating" indication. When the plug is fully engaged, the coupling ring can be rotated 45° to the safety lock position; if the plug is not

completely engaged, the coupling ring cannot be turned to the safety lock position. Consequently, under "blindmating" conditions, it is always possible to determine if the plug is properly engaged without visual reference, damage, or accidental disengagement.

The environmental integrity is guaranteed by multiple seal construction using silicone rubber "O" rings and a floating, voidless insert construction. The floating insert design allows the inserts to move within the connector housing to control interfacial sealing pressure in spite of tolerance accumulation, and a compression interfacial seal with minimum engaging force. Both the primary "O" ring system and the continuous dielectric construction withstand the MIL-C-38300A altitude breathing test. The sealing system meets the air leakage requirements of not more than 1 cubic inch

of air per hour at a 30 P.S.I. pressure differential. This redundant sealing method is indicative of the inherent reliability built into our connectors.

MARC 53 Series Connector power contacts are manufactured from high grade copper alloys, and are designed to be crimped with standard M22520 tooling using subminiature contact locators.

MARC 53 Series Connectors incorporate hard insulators in both the plug and receptacle inserts for exceptional contact stability. Shoulder entrapment positively retains the front insertable MD53 contacts between the front and rear insulators. The new RMD53 contacts are rear insertable and removable and are retained within the connector insulators by clips which can be visually inspected. No insertion or extraction tools are

required for either the MD53 or RMD53 contacts using nominal size wire.

MARC 53 Series Connectors are truly field serviceable... no special tools are required for maintainability. In addition, connector subcomponents damaged through handling or misuse can be procured separately generally without the need to scrap entire connector units.

Weight reductions as high as 67% are achieved without loss of performance.

MARC 53 Series Connectors are available in both environmental and hermetic styles. In addition to the positive lock plug, a threaded coupling plug is also available. Part numbers for configurations offering various finishes and accessories plus other design variations to satisfy special requirements are also available.

shoulder entrapped contacts

RMD53
rear insertable contacts

Materials and Finishes

Housings and quick disconnect couplings are machined from bar stock aluminum to combine maximum strength with minimum weight. Threaded couplings are machined from non-magnetic, stainless steel bar stock for durability of the coupling threads. Contacts are manufactured from high conductivity copper alloys

which have been selected for low contact resistance over the operating range of the connectors. Inserts are molded from flame-resistant, glass-filled diallyl phthalate, meeting MIL-M-14 requirements. All resilient parts are made of high-temperature, silicone elastomers. Fuel resistant compounds are used where swelling affects

the performance of the connector. All materials are selected for their non-magnetic properties.

The standard finish is hard black, non-conductive, anodized finish on connector housings and quick disconnect couplings; stainless steel threaded coupling is passivated with black oxide finish. Conductive finish

modifications include gold finish and electroless nickel finish. Multi-finish modifications for connector plugs include black anodized disconnect coupling with conductive finish on shell grounding members. Contacts are gold plated per MIL-G-45204 requirements. See Page 5081 for modification information.

Service and Performance Data

Circular Connectors

MARC 53 Series Connectors (Continued)

I. Electrical — Electrical Ratings

Contact Size	Current Rating (Amperes, Max., 81°F [+27°C])	Dielectric Withstanding Voltage (RMS)	Working Voltage		Contact Resistance (Millivolts, Max.)
			Sea Level	110,000 ¹ Ft. Alt.	
22 AWG	5	1000	750	300	15
16 AWG	20	1000	750	300	20

¹ 10,000 ft equals 33,528 m altitude.

Wire Sizes Accommodated

Contact Size	Cond. Dia. (Stranded) ¹	Jacket Size ²
22 AWG	.019-.032 .483-.813	.039-.054 .991-1.37
16 AWG	.038-.061 .965-1.55	.065-.081 1.65-2.05

¹ Tolerance of conductor diameters required for a reliable crimp. Smaller sizes readily accommodated — consult Tyco Electronics.

² Smaller jacketed cable can be accommodated but environmental seal may be impaired. Smooth extruded jacket should be used for consistent wire sealing.

Insulation Resistance: 5000 megohms, minimum, at room ambient conditions.

II. Mechanical — Durability: 500 Cycles Mate/Unmate.

Coupling/Uncoupling Forces and Tightening Torques:

Shell Size	Coupling/ Uncoupling Force (In-Lbs.) Max.	Tightening Torque (In-Lbs.)	
		Retaining Nut	Mounting Nut
9	18 [80.07 N]	20 [2.26 Nm], Max.	30-45 [3.39 – 5.08 Nm]
12	22 [97.86 N]	20 [2.26 Nm], Max.	40-55 [4.52 – 6.21 Nm]
15	27 [120.10 N]	20 [2.26 Nm], Max.	55-70 [6.21 – 7.91 Nm]
18	32 [142.34 N]	20 [2.26 Nm], Max.	70-85 [7.91 – 9.60 Nm]

Operating Temperature: -67°F to 257°F [-55°C to +125°C]

Connector Mated Length: MD Plug (06) mated to MD Receptacles (00) (01) (02) (12): 2.031 [51.58], max. RMD Plug (06) mated to RMD Receptacles: 2.217 [56.31], max.

Test Data

MARC 53 Series Connectors exceed the requirements of specification MIL-C-38300A (USAF) as detailed in the applicable M38300A (USAF) military specification sheets.

MARC 53 Series Connectors meet the following selected test parameters as specified below:

DESCRIPTION MIL-C-38300 Test Para	TEST REQUIREMENTS
Contact Retention Para. 4.10.3	MD Contacts shall withstand 15 lbs [66.72 N] axial load and RMD contacts 10 lbs [44.48 N] axial load without axial displacement in excess of 0.012 [.305] or damage to contacts or inserts when the axial load is applied to the mating end of the contacts in unmated plugs and receptacles at a rate of approximately 1 lb/sec. [4.45 N].
Contact Resistance Para. 4.10.8	The potential drop across normally mated contacts shall not exceed 25 mv under room ambient and high temperature service conditions when measured as specified in MIL-C-26636, Fig. 2, with maximum rated current.
Dielectric Withstanding Voltage, Altitude and Sea Level Para. 4.10.10	No evidence of dielectric breakdown or flashover when mated and unmated plugs are subjected to 645 and 180 volts RMS, respectively, at altitudes up to 110,000 feet [33,528 m] and 1000 volts RMS at sea level.
Insulation Resistance, Room and High Temp. Para. 4.10.13 and 4.10.13.1	Insulation resistance of mated plugs and receptacles shall be 5000 megohms, minimum, at room temperature and 1000 megohms, minimum, at 257°F [+125°C] when measured per MIL-STD-202, Method 302, Test Condition B.
Coupling and Uncoupling Para. 4.11.3	Plugs and receptacles shall withstand up to 500 cycles of engagement and separation (locking mechanism actuated with each cycle) without detrimental damage to plugs or receptacles or not satisfying subsequent tests of MIL-C-38300.
Fluid Immersion Para. 4.11.5	Mating and unmating forces shall not exceed 27 lbs, [120.10 N] maximum, (15 shell size) after fully wired plugs and receptacles are immersed for 20 hours, each, in hydraulic fluid (MIL-H-5606) and high temperature lubricating oil (MIL-L-9236) followed by a one-hour dry.
Sweep Vibration, Mated Para. 4.11.6	Mated connectors shall show no circuit interruptions greater than one microsecond during 12 hours vibration to include six sweeps in each axis at extreme temperatures of -85°F [-65°C] and 257°F [+125°C] per MIL-STD-202, Method 204, Test Condition D. Post inspection shall show no detrimental cracking, breaking, or loosening of parts.
Moisture Resistance Para. 4.11.8	The insulation resistance of mated connectors shall exceed 1000 megohms after subjection to moisture resistance testing per MIL-STD-202, Method 106, as amended by MIL-C-38300.
Altitude Breathing Para. 4.11.12	The insulation resistance of wired and mated connectors shall be 5000 megohms, minimum, and there shall be no flashover or breakdown at a test voltage of 1000 volts RMS after the third cycle and while immersed in 5% salt water solution at 68°F [20°C] and room ambient pressure pressure at 68°F [20°C].
Salt Spray Para. 4.11.13	Unmated plugs and receptacles shall show no excessive corrosion which would detrimentally affect the electrical and mechanical performance of the connectors after subjection to 24 hours exposure to salt spray atmosphere per MIL-STD-202, Method 101.

⁵ Arrangement also available in hermetic seal receptacles.

⁶ Arrangement available in 06, 00, 01.

Part Number and Ordering Information

MARC 53 Series Connector part numbers indicate size, shape, insert layout, type of seal, style of contact and polarization.

Note: Pin or socket (power or coaxial) contacts may be used in either plugs or receptacles. However, it is recommended that pins be placed in the receptacles when possible to take advantage of our "scuff-proof" design.

Alternate Keying — Standard alternate polarizing key positions are shown below. Additional polarizing keyways are available upon request.

Supplemental Accessory Hardware — We also manu-

facture supplemental accessory hardware (protective covers, shield adapters, etc.) to adapt these connectors to almost any application. For modifications to fit your requirements, contact Tyco Electronics.

Accessories

Test Adapter

The test adapter accessory is utilized primarily as a connector simulator to preserve the end-use connector where this connector would be subjected to extensive testing, matings, or probings. The test adapter, when mated, provides the exact mating interface as that of the end-use connector and is completely field serviceable.

Note: Standard length plug occupies contact cavity and wire sealing grommet. Short length plug occupies wire sealing grommet only (to be used behind non-wired contacts and in plugs which mate to hermetic receptacles).

Modifications

We offer a unique modification identification system which provides alteration of standard MARC 53 Series Connectors to include special finishes, accessories, MARC 43 Series Connector contact arrangements, and custom quality assurance provisions — processing, testing, serialization, traceability. Consult Tyco Electronics for additional modification information.

Standard modifications include:

- (503): MARC 53 Series Connector including cable clamp, straight type
- (504): MARC 53 Series Connector including cable clamp, right-angle type
- (506): MARC 53 Series Connector, gold finish

- (507): MARC 53 Series Connector, electroless nickel finish
- (508): MARC 53 Series Connector, black anodized coupling ring, gold over electroless nickel housings, retaining nuts and hardware.

MARC 63 Series Connectors RMD63 Performance Data

MARC 63 Series Connectors, RMD63 Series meet or exceed the performance requirements of specification MIL-C-38300A (USAF) as detailed in the M38300A (USAF) military specification sheets covering the MARC 63 Series Connectors. Tyco Electronics can supply detailed, cross reference information. MARC 63 Series Connectors, RMD63 Series meet the following selected test parameters as specified below:

DESCRIPTION	TEST REQUIREMENTS
Contact Retention	Contacts are to withstand 15 lbs. [66.72 N] axial load and RMD contacts 10 lbs. [44.48 N] axial load without axial displacement in excess of 0.012 [.305] or damage to contacts or inserts when the axial load is applied to the mating end of the contacts in unmated plugs and receptacles at a rate of approximately 1 lb/sec. [4.45 N].
Contact Resistance	The potential drop across normally mated contacts shall not exceed 25 mv under room ambient and high temperature service conditions when measured as specified in MIL-C-26636, Fig. 2, with maximum rated current.
Dielectric Withstanding Voltage, Altitude and Sea Level	No evidence of dielectric breakdown or flashover when mated and unmated plugs are subjected to 645 and 180 volts RMS, respectively, at altitudes up to 110,000 [33,528 m] feet and 1000 volts RMS at sea level.
Insulation Resistance, Room and High Temp.	Insulation resistance of mated plugs and receptacles shall be 5000 megohms, minimum, at room temperature and 1000 megohms, minimum, at 257°F [+125°C] when measured per MIL-STD-202, Method 302, Test Condition B.
Coupling and Uncoupling	Plugs and receptacles shall withstand up to 500 cycles of engagement and separation without detrimental damage to plugs or receptacles or not satisfying subsequent tests of MIL-C-38300.
Fluid Immersion	Mating and unmating forces shall not exceed 27 lbs. [120.10 N], maximum, (15 shell size) after fully wired plugs and receptacles are immersed for 20 hours, each, in hydraulic fluid (MIL-H-5606) and high temperature lubricating oil (MIL-L-9236) followed by a one-hour dry.
Sweep Vibration, Mated	Mated connectors shall show no circuit interruptions greater than one microsecond during 12 hours vibration to include six sweeps in each axis at extreme temperatures of -85°F [-65°C] and 257°F [+125°C] per MIL-STD-202, Method 204, Test Condition D. Post inspection shall show no detrimental cracking, breaking, or loosening of parts.
Moisture Resistance	The insulation resistance of mated connectors shall exceed 1000 megohms after subjection to moisture resistance testing per MIL-STD-202, Method 106, as amended by MIL-C-38300.
Altitude Breathing	The insulation resistance of wired and mated connectors shall be 5000 megohms, minimum, and there shall be no flashover or breakdown at test voltage of 1000 volts RMS after the third cycle and while immersed in 5% salt water solution at 68°F [20°C] and room ambient pressure at 68°F [20°C].
Salt Spray	Unmated plugs and receptacles shall show no excessive corrosion which would detrimentally affect the electrical and mechanical performance of the connectors after subjection to 24 hours exposure to salt spray atmosphere per MIL-STD-202, Method 101.

Part Number and Ordering Information

Connector part numbers indicate size, shape, insert layout, type of seal, style of contact and polarization.

Note: Pin or socket (power or coaxial) contacts may be used in either plugs or receptacles. However, it is recommended that pins be placed in the receptacle when possible to take advantage of our "scuff-proof" design.

Typical Part Number

(1) For polarizing key positions see MARC 53 Series Connectors.

(2) For contact arrangements see MARC 53 Series Connectors.

Note: If P or S does not appear in the numbering system, no contacts will be supplied with order (order separately).

Service and Performance Data

MARC 73 Series Connectors meet or exceed the performance requirements of specification MIL-C-38999. Your sales representative or field engineer can supply detailed, cross-reference information. MARC 73 Series Connectors meet the following selected test parameters as specified below:

DESCRIPTION	TEST REQUIREMENTS
Contact Retention	Contacts are to withstand 10 lbs [44.48 N] axial load without axial displacement in excess of 0.012 [0.30] or damage to contacts or inserts when the axial load is applied to the mating end of the contacts in unmated plugs and receptacles at a rate of approximately 1 lb/sec. [4.45 N].
Contact Resistance	The potential drop across normally mated contacts shall not exceed 25 mv under room ambient and high temperature service conditions when measured as specified in MIL C-39029 with maximum rated current.
Dielectric Withstanding Voltage, Altitude and Sea Level	No evidence of dielectric breakdown or flashover when mated and unmated plugs are subjected to 645 and 180 volts RMS, respectively, at altitudes up to 70,000 feet [21,336 m] and 1000 volts RMS at sea level.
Insulation Resistance, Room and High Temp.	Insulation resistance of mated plugs and receptacles shall be 5000 megohms, minimum, at room temperature and 1000 megohms, minimum, at 257°F [+125°C] when measured per MIL-STD 202, Method 302, Test Condition B.
Coupling and Uncoupling	Plugs and receptacles shall withstand up to 500 cycles of engagement and separation without detrimental damage to plugs or receptacles or not satisfying subsequent tests.
Fluid Immersion	Mating and unmating forces shall not exceed 27 lbs [120.10 N] maximum, (15 shell size) after fully wired plugs and receptacles are immersed for 20 hours, each, in hydraulic fluid (MIL-H-5606) and high temperature lubricating oil (MIL-L-9236) followed by a one-hour dry.
Sweep Vibration, Mated	Mated connectors shall show no circuit interruptions greater than one microsecond during 12 hours vibration to include six sweeps in each axis at extreme temperatures of -85°F [-65°C] and 257°F [+125°C] per MIL-STD-202, Method 204, Test Condition D. Post inspection shall show no detrimental cracking, breaking, or loosening of parts.
Moisture Resistance	The insulation resistance of mated connectors shall exceed 1000 megohms after subjection to moisture resistance testing per MIL-STD-202, Method 106.
Altitude Breathing	The insulation resistance of wired and mated connectors shall be 5000 megohms, minimum, and there shall be no flashover or breakdown at test voltage of 1000 volts RMS after the third cycle and while immersed in 5% salt water solution at 68°F [20°C] and room ambient pressure at 68°F [20°C].
Salt Spray	Unmated plugs and receptacles shall show no excessive corrosion which would detrimentally affect the electrical and mechanical performance of the connectors after subjection to 24 hours exposure to salt spray atmosphere per MIL-STD-202, Method 101.

Filler plug occupies insert cavity only.

MQR Series — Microminiature Circular Connectors

MQR stands for MICRODOT Quick Release. This line of circular quick disconnect connectors has metal shells with push-pull couplings which provide a positive connection for rugged environmental use. The MQR series is specified for cable-to-cable and cable-to-panel applications.

The plug connector side contains socket contacts. The receptacle connector side contains pin contacts. Because the pin contact is

“active” or “live”, the pins require the physical protection that the receptacle side offers. (Similar to a “protected” or “shrouded” header.)

While there is no optional hardware for the MQR series, the receptacles incorporate a standard jam nut to tighten the connector down to the board or panel.

MQR connectors are manufactured to the performance specifications of MIL-PRF-83513.

Introduction

Product Facts

- Military qualified connectors conform to the latest amendments of MIL-DTL-24308
- Industrial versions available that use the same manufacturing process of MIL-C-24308 connectors
- Non-magnetic versions available per NASA spec, or with rubber grommet on rear of NASA-type connector
- ULTRA-LITE AMPLIMITE non-magnetic connectors save weight and improve EMI shielding vs. brass shell NASA-style connectors
- MIL-C-39029 contacts offer reliability and economies of high speed termination by automatic machine
- Connector savers (feed-through) preserve permanently mounted connectors in high use applications
- Choice of sizes — Size 1 through 5 for Series 109, standard density with 9, 15, 25, 37 and 50 contacts; Size 1 through 6 for Series 90, high density with 15, 26, 44, 62, 78 and 104 contacts
- Series 109 standard density connectors are available with cavities for power or coaxial contacts mixed with size 20 signal contacts
- Right-angle and straight PC board connectors in Series 109, standard density
- Preloaded, straight-posted connectors available in Series 90, high density
- Preloaded, solder cup connectors available in Series 109, standard density
- Produced under a Quality Management System certified to ISO 9001

A copy of the certificate is available upon request

AMPLIMITE Military Subminiature D Connectors are compact pin and socket connectors especially designed for high density packages. They are ideally suited for applications such as military equipment, ground support devices, computer peripheral equipment, modems and industrial instrumentation.

In addition to the complete selection of standard military subminiature D-type connectors, Tyco Electronics offers special application versions such as connectors which mix power/coax cavities with size 20 signal contacts; feed-through connectors which provide a disposable interface for high use applications; and special non-magnetic connectors with a rubber grommet on the rear, for strain relief.

Series 109 and Series 90 military connectors conform

to the latest amendments of the MIL-DTL-24308 specification and thus are interchangeable with similar connectors in the same sizes from other manufacturers. A broad range of connectors is included in this catalog, complemented by a variety of commercial cable clamps and mating hardware, which can be found in catalog 1307612.

Each AMPLIMITE crimp connector has metal clips which retain the pins and sockets after they are loaded into the inserts from the rear.

Series 109 connectors accept size 20 contacts, while Series 90 connectors accept size 22 contacts. Cavity spacing conforms to military specifications.

Size 20 and size 22 pins and sockets are designed for an 8-indent crimp. They are supplied loose-piece for

crimping in a standard M22520/2 hand operated tool or tape-mounted for high speed application by an AMP-TAPEMATIC Stripper/Crimper Machine.

Series 90 and Series 109 connectors preloaded with contacts are available for printed circuit board mounting.

Special Series 109 connectors with power/coax cavities accept power contacts for 18 through 8 AWG [0.8-8 mm²] wire or coaxial contacts for RG/U 174, 188A and 316 cable, in combination with standard size 20 signal contacts.

A complete range of non-military AMPLIMITE subminiature D connectors, contacts and accessories are shown in catalog 1307612, available on request from Tyco Electronics.

Introduction (Continued)

Connectors for crimp, snap-in contacts are available in both series, standard shells and non-magnetic, plus non-magnetic with rear rubber grommet.

Coax or power contacts can be mixed with signal contacts.

Connector savers extend life in high-use applications.

Straight posted versions available in both (Series 109) standard density and (Series 90) high density connectors.

Right-angle board mount connectors for Series 109, standard density connections.

ULTRA-LITE AMPLIMITE Connectors for state-of-the-art weight savings and EMI performance.

The Series 109 and 90 Blindmate Plug connectors are designed to prevent butting of contacts during mating.

Performance Specifications

All Series 109 AMPLIMITE military connectors conform to the latest amendments of military specification MIL-DTL-24308. For more detailed information refer to MIL-DTL-24308.

All Series 109 Connectors are designed for a -67°F to 257°F [-55°C to +125°C] temperature range.

Series 109 contact current rating for Crimp Snap Connectors for MIL-C-39029 7.5 amps in free air.

Series 109 contact current rating for PCB Mount Connectors 5.0 amps per 108-1770.

Notes: 1. Size 20 contacts supplied with connectors are loose piece.

2. "F" is stamped on connectors following M24308 Part Number as required. "F" designates cadmium shell plating.

3. See pages 5151 through 5155 (Military to AMP Part Number cross reference) for additional part numbers.)

Crimp, Series 109, Standard Density Connectors (Industrial Grade)

Material and Finish:

Shell — Steel, zinc plated

Insert — Approved material per MIL-DTL-24308

Retention Clips — Stainless steel

Related Product Data:

Cavity Identification — page 5101

Contacts — pages 5102-5104

Mounting, Mating Specifications — page 5143

Accessories — pages 5148-5150

Attention: Connector marking

Connector marking may differ from package marking.

Note: Meets requirements of MIL-DTL-24308

**Straight PCB, Series 109, Standard Density Connectors
(Industrial Grade)**

Material and Finish:

Shell — Steel, see below

Insert — Approved material per MIL-DTL-24308

Contact — Copper alloy plated gold over nickel underplate*

Spacer — Aluminum alloy, Iridite finish

Related Product Data:

**Straight PCB, Series 109, "Make First Break Last" Sub-D Connectors
(Industrial Grade)**

Material and Finish:

Shell — Steel, cadmium or tin plated

Insert — Polyester per MIL-M-24519

Contact — Copper alloy with .000030
[0.00076] min. gold plate over .000050
[0.00127] min. nickel underplate

***Regular Length Contact Location:**
1, 6, and 9

***Short Length Contact Location:**
2 thru 5, 7, and 8

***Finish** — Cadmium per QQ-P-416

***Finish** — Tin plated per MIL-T-10727

**Right-Angle, PCB Plugs, Series 109, with One Piece Insert
(Industrial Grade)**

Material and Finish:

Shell — Steel, see below

Insert — Thermoplastic

Contact Material — Brass or Beryllium copper

Contact Finish — Gold with .000010 [0.00025] min. gold plate over .000050 [0.00127] min. nickel underplate

Interfacial Seal — Fluorosilicone

3 and 5 Positions (with interfacial seal)

9 Position (with Locking Post)

*Signal Contacts are solder dipped with SnPb 63/37 to meet the requirements of MIL-DTL-24308, method 208.

Mounting Abbreviations: Std. = Standard, F/F = Front Float, D/F = Dual Float

Note: The suffix "F" on M24308 part numbers designates cadmium shell plating.

Connector Savers, Series 109, Standard Density

Connector savers prolong the life of permanently installed connectors which would otherwise be subjected to repeated cycles of mating and unmating, in applications such as test interfaces or on testing devices.

Material and Finish:

Standard —

Shell — Steel, cadmium plated
Contact Body — Beryllium copper with .000050 [0.00127] min. gold plate over .000050 [0.00127] min. nickel underplate
Socket Hood — Passivated stainless steel
Insert — Glass filled polyester
Spacer — Black nylon

Non Magnetic —

Shell — Brass, gold plated
Contact Body — Beryllium copper with .000050 [0.00127] min. gold plate over .000100 [0.00254] min. copper underplate
Socket Hood — Brass with .000050 [0.00127] min. gold over .000100 [0.00254] min. copper underplate
Insert — Glass filled polyester
Spacer — Black nylon

Notes:

- NASA connectors listed above are qualified to NASA specification 311-P-405. See pages 5156 and 5157 for NASA cross reference.
- Plug insert arrangements shown. Receptacle arrangement is mirror image.
- Cable clamp/strain relief hardware cannot be used with these arrangements.
- See pages 5146 and 5147 for PCB layouts.
- Blindmate plugs feature a chamfered lead-in on the front shell, which is constructed of aluminum alloy. See page 5109 for shell dimensions.
Blindmate receptacles feature float bushings installed in the mounting holes. See pages 5105 and 5106 for shell dimensions.
- The 3C3 arrangement can be mated 180°. Contact Tyco Electronics or call Technical Support for keyed Part Numbers.
- All connector plugs with grounding indents except the cadmium plated.

1. Plug insert arrangements shown. Receptacle arrangement is mirror image.
2. See AMP customer drawing for PCB layouts.
3. The 3C3 arrangement can be mated 180°. Contact your Tyco Electronics Sales Engineer or call Technical Support for keyed Part Numbers.

**Size 8 Contacts (Power) for Standard Density,
Series 109 Power/Coax/Signal Connectors**

Crimp Contacts

Material and Finish:

Copper alloy, plated gold over nickel underplate

Retention Clips — Stainless steel or phosphor bronze

Note: clip may differ from view shown

Product Specification:

For Crimp Contacts — 108-10045
(current rating and wire size)

For PCB Contacts — 108-10045-1

Hand Crimp Tool — AMP 608651-1
with positioner AMP 608651-2

Extraction Tool — 318813-1

Wire Size Range		Dim. A	Part Numbers

Notes:

1. Non Impedance Matched contacts and 50 ohm contacts are not intermateable.
2. Use these contacts only with the **Standard** connectors on pages 5122 and 5123.

RF Contacts for Standard Density,
Series 109 Power/Coax/Signal Connectors (Continued)

Materials

Center Contacts — Beryllium Copper or Brass per QQ-B-626, per QQ-C-530, gold plated

Outer Contacts — Beryllium copper per QQ-C-530, gold plated

Plugs — Beryllium copper per QQ-C-530, gold plated

Jack — Stainless steel per ASTM-A-582, gold plated

Shells — Stainless steel per ASTM-A-582, passivated

Panel Shells — Brass per QQ-B-626, nickel plated

Dielectrics — TEFLON per ASTM-D-1457

Grip Rings — Brass per MIL-C-50 or Beryllium Copper per QQ-C-530, nickel plated

Springs — Steel wire per QQ-W-470

Bushings — Stainless steel per ASTM-A-582, passivated

Retention Springs — Beryllium Copper per QQ-C-530, Tin-Lead Plated

Finishes

Passivate per QQ-P-35

Gold per MIL-G-45204

Nickel per QQ-N-290

Tin-Lead per ASTM-B-545

Performance Characteristics:

Electrical Characteristics

Nominal Impedance — 50 ohms

Frequency Range —

2.8 mm: 0 to 26.5 GHz

2.8 mm for size 8 cavities: 0 to 40 GHz

Operating Voltage —

RG-402/U Cable (3.58 [.141] O.D.)

Performance Specifications

All Series 90 AMPLIMITE military connectors conform to the latest amendments of military specification MIL-DTL-24308. For more detailed information, refer to MIL-DTL-24308.

All Series 90 connectors are designed for a -67°F to 257°F [-55°C to +125°C] temperature range.

Notes: See pages 5151 through 5155 (military to AMP Part Number cross reference) for additional part numbers.

¹ Size 22 sockets supplied with receptacles are loose piece.

² "F" is stamped on connectors following M24308 part number as required. "F" designates cadmium shell plating.

³ Meets requirements of MIL-DTL-24308.

**Non-Magnetic Crimp Plugs, Series 90, High Density Connectors
(NASA Qualified)**

Connector Material and Finish

Shell — Brass, gold plated

Insert — Approved material per MIL-DTL-24308

Retention Clips — Copper alloy

Right-Angle PCB, Series 90, with Female Screwlocks

Material and Finish

Shell — Brass, gold over copper plated

Insert — Diallyl phthalate or polyester
or Polyphenylene Sulfide (PPS)

Shell Size 1 thru 4

Plugs

Connector Savers, Series 90, High Density Connectors

Connector savers prolong the life of permanently installed connectors which would otherwise be subjected to repeated cycles of mating and unmating, in applications such as test interfaces or on testing devices.

Material and Finish

Standard

- Shell** — Steel, cadmium plated
- Contact Body** — Beryllium copper, .000050 [0.00127] min. gold plate over .000050 [0.00127] min. nickel underplate
- Socket Hood** — Passivated stainless steel
- Insert** — Polyphenylene Sulfide (PPS)
- Spacer** — Black nylon

Non Magnetic

- Shell** — Brass, gold plated
- Contact Body** — Beryllium copper, .000050 [0.00127] min. gold plate over .000050 [0.00127] min. copper underplate
- Socket Hood** — Brass, .000050 [0.00127] min. gold plate over .000100 [0.00254] min. copper underplate
- Insert** — Polyphenylene Sulfide (PPS)
- Spacer** — Black nylon

Introduction

Product Facts

- One-piece aluminum shells for light-weight and enhanced EMI performance
- Connectors are typically 15–20% lighter than brass counterparts
- Intermates/interchanges with existing designs
- Enhanced EMI performance over brass shells by 10–20 dB
- Series 109 Plugs & Receptacles in shell size 1 through 5 (9–50 positions)
- Series 90 Plugs & Receptacles in shell size 1 through 6 (15–104 positions)
- Can be provided with or without grommet
- Plug shells include grounding indents
- Designed to meet NASA 311P
- Designed to meet MIL-DTL-24308D specification
- DSCC Drawings 99012 through 99015

Material and Finish

Housing Material — Polyphenylene Sulfide (PPS)

Shell Finish — .000050 [0.00127] min. gold plate over .00100–.00125 [0.0254–0.0318] nickel underplate

Shell Material — Aluminum alloy

Temperature Range —

-67°F to 257°F [-55°C to 125°C]

Voltage Rating — 300 V

Current Rating — Contact current rating per MIL-C-39029

Size 20 — 7.5 amps in free air
Size 22 — 5.0 amps in free air (refer to MIL Spec. for cable specifications)

Low Level Termination

Resistance — 11 Ohm max. 109 Series, 17 milliohms only for 90 Series per MIL-C-39029

Performance Characteristics

Dielectric Withstanding Voltage — 1000 VAC between adjacent pos.

Insulation Resistance — Min. 1000 milliohm between adjacent pos.

Voltage Rating — 300 V

Durability — Up to 500 matings/cycle

Vibration — 3.13 G's RMS between 5–500 Hz 15 minutes per plane

Physical Shock — 18 drops, half-sine 30 G's at 11 millisecond

Temperature Range — -67°F to 257°F [-55°C to 125°C]

Thermal Shock — -67°F to 257°F [-55°C to 125°C]

Temperature-Humidity — 77°F to 149°F [+25°C to +65°C] at 95% relative humidity

Corrosion — Mixed flowing gas, class II

Product Specifications — 108-1834 (Design objectives)

Weight Comparisons for the AMPLIMITE Connector Series 90 (1) PC AL vs the (2) PC Brass NASA Grade Connector Assemblies

Receptacles

ULTRA-LITE Connector Plugs and Receptacles, Series 109

Connector Material and Finish

Shell — Aluminum alloy, gold plated per MIL-G-45204 over nickel per MIL-C-26074.

Insert — Blue diallyl phthalate per MIL-M-14 or black Polyphenylene Sulfide (PPS) per MIL-M-24519 or blue thermoplastic per MIL-M-24519

Retention Clips — Beryllium copper

Grommet — Silicon rubber per ZZ-R-765, color: red

Contacts — Uses size 20 crimp or posted contacts, ref. pages 5102-5104.

Note: AMP Part Nos. are not NASA approved parts, but will conform to NASA's performance requirements.

Application Tools for Series 109 (Size 20) Crimp Contacts

**Pin and Socket
Insertion/Extraction Tool**

AMP Part Number 91067-2 or
MIL Part Number M81969/1-02

Insertion tip, for replacement
Part Number 126195-3

Extraction tip, for replacement
Part Number 126195-4

**AMP-TAPEMATIC Stripper/
Crimper Machine Part Number
599406-7**

**Funnel Part Number 125905-1 for
Size 20 Contacts**

The AMP-TAPEMATIC Stripper/Crimper Machine strips wire and applies an 8-indent crimp termination per MIL-C-22520. The machine terminates pin and socket contacts which are tape mounted and reel fed. It offers production rates of up to 1200 finished leads per hour, provides overall lower applied costs and maintains a high degree of termination reliability.

**Hand Crimping Tool
AMP Part Number 601966-1 or
MIL Part Number M22520/2-01**

**Positioner
AMP Part Number 601966-5 or
MIL Part Number M22520/2-08**

This standard military-type hand tool terminates pins and sockets to wire with an 8-indent, M22520/2 crimp. It is ideally suited for prototype, field maintenance and other applications where volume production is not a factor.

Application Tools for Series 90 (Size 22) Crimp Contacts

**Pin and Socket
Insertion/Extraction Tool**

AMP Part Number 91067-1 or
MIL Part Number M81969/1-04

Insertion tip, for replacement
Part Number 126237-1

Extraction tip, for replacement
Part Number 126195-2

**AMP-TAPEMATIC Stripper/
Crimper Machine Part Number
599406-7**

**Funnel Part Number 125905-2 for
Size 22 Contacts**

The AMP-TAPEMATIC Stripper/Crimper Machine strips wire and applies an 8-indent crimp termination per MIL-C-22520. The machine terminates pin and socket contacts which are tape mounted and reel fed. It offers production rates of up to 1200 finished leads per hour, provides overall lower applied costs and maintains a high degree of termination reliability.

**Hand Crimping Tool
AMP Part Number 601966-1 or
MIL Part Number M22520/2-01**

**Positioner (Pin)
AMP Part Number 601966-6 or
MIL Part Number M22520/2-09**

**Positioner (Socket)
AMP Part Number 601966-4 or
MIL Part Number M22520/2-06**

This standard military-type hand tool terminates pins and sockets to wire with an 8-indent, M22520/2 crimp. It is ideally suited for prototype, field maintenance and other applications where volume production is not a factor.

Mating and Mounting Specifications for
Series 109 and Series 90 Connectors

Plug Receptacle Mating

Shell Sizes 1 and 2 —

x = .280/.250 [7.11/6.35]

Shell Sizes 3, 4, 5 and 6 —

x = .271/.241 [6.88/6.12]

Blindmate Connectors (all sizes) —

x = .270 [6.86] min.

The X dimension is necessary for full mating of connector halves. This dimension must be taken into consideration when determining the method of mounting, panel thickness, etc.

AMPLIMITE Plug,
Front-Panel Mounted

AMPLIMITE Receptacle,
Rear-Panel Mounted

Attention: Front-Panel Mount

When front mounting a MIL-DTL-24308 connector utilizing the tab method of securing shell halves, it is recommended to utilize a .032 [0.81] thick washer (not supplied) to prevent deformation of connector flange.

^ΔEach part is individually bulk packed for multiple kit orders.

^{ΔΔ}With captivated star washer. No additional hardware included.

†Part Number 748270-2 and 748271-1 Dimension .158 [4.01]

††206897-1 kit contains 2-screwlocks, 2-hex nuts and 2-retainers.

**M2.6 is the female thread size. The male thread size is 4-40.

***M3 is the female thread size. The male thread size is 4-40.

Notes: 1. All parts are packaged unassembled.

2. Each female screwlock kit is comprised of two assemblies as illustrated above.

3. One or two flat washers may be required for panel thicknesses less than .060 [1.52]. Female screwlocks are not recommended for panel thicknesses greater than .060 [1.52].

4. Female screwlocks with 2-56 thread size are to be used with cable clamps with mounting flanges. Female screwlocks with 4-40 and M3 (Metric) thread sizes can be used with all other cable clamps.

5. Female screwlocks mate with male screw retainers (page 5149).

6. Series 90 and 109 Connectors without eyelets or floating bushings.

Male Screw Retainers for Metal-Shell Connectors

Material and Finish

Male Screw — Steel, zinc plated clear or yellow chromate

Retaining Clip — .012 [0.31] stainless steel

Technical Documents

Instruction Sheet — 408-7837

Male Screw Finish	Thread Size	Dimension A	Male Screw Retainer Kit No.	
			Individual	Bulk Packed*
Yellow Chromate	4-40	.220 5.59	205980-1	205980-3

	M2.6 (Metric)	.225 5.72	750035-1	—
Clear Chromate	4-40	.220 5.59	205980-4	205980-5
		.200 5.08	745136-3	745136-4

*Each part is individually bulk packed for multiple kit orders.

- Notes:**
1. All parts are packaged unassembled.
 2. Each kit is comprised of two male screws and two retaining clips. Male screw retainers are also furnished as part of cable clamp kits (pages 5148 and 5149).
 3. Male screw retainers mate with female screwlocks (page 5148) and with metal-shell board mount connectors featuring 4-40 threaded inserts or female screwlocks.
 4. Retaining clip must be assembled onto connector flanges with threaded hole toward wire side of connector.

Stainless Steel Kit

Materials

All Parts — Stainless steel, passivated per QQ-P-35B.

AMP Part Number 211883-5 or MIL Part Number M24308/25-6P

Notes:

1. Each kit includes two screws and two retainers.
2. Retainer is assembled onto connector flange with threaded hole toward the wire side of the connector.

Introduction

Product Facts

- **Modular versatility with Multimate contact capabilities permit multiple combinations of power, signal, coaxial and fiber optic circuits in one basic connector configuration**
- **Choice of shell sizes for housing one, two or three contact modules**
- **Modules available accommodating various circuit arrangements**
- **Polarized shells, with and without floating bushings**
- **Machine-applied terminations provide high production rates at low applied cost**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

AMP G Series connectors provide a practical means of mixing various types of electrical circuits in one basic connector configuration. They offer modular versatility as well as Multimate contact capabilities which permit use of multiple combinations of power, signal, coaxial and fiber optic circuits in the same connectors.

The "G" Series connector line provides a choice of shell sizes for housing either one, two, or three

contact modules. The modules, in turn, are available in a variety of circuit densities to accommodate Type XII power contacts; Size 12 Type I and miniature COAXICON contacts (interchangeable in the same contact cavity); and Size 16 Type II, III+, VI, X, subminiature COAXICON contacts.

Each shell includes a retain-er plate for easy drop-in assembly of the contact modules. Both shell and retainer are made of cast

aluminum. Shells also are available with and without floating bushings and are polarized with keyways in the receptacles and matching keys in the plugs. The modules are made of either diallyl phthalate or general purpose phenolic.

Complementing the "G" Series modular connectors are latching hardware, cable clamps and strain relief which ensure the integrity of all mated connections.

Technical Documents

The following is a list of technical documents covering the application, performance and maintenance of "G" Series Connectors.

Product Specifications describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

108-10002 — AMP G Series Connectors

108-10037 — Type XII Contacts

Instruction Sheets provide instructions for assembling or applying the product. They are intended for the Manufacturing Assembler or Operator.

Product —

Connectors, Contacts and Accessories — 408-7171, 408-7184, 408-7189, 408-7190, 408-7230

Locking Latch — 408-7268

Locking Spring — 408-7187

Cable Clamps — 408-7185

Strain Relief — 408-7186, 408-7263

Tooling —

Crimping Dies:

Type I Contacts 1 — 408-7225

Type II Contacts — 408-7420, 408-7453

Type XII Contacts — 408-7175

Miniature COAXICON Contacts — 408-1770

Hand Crimping:

Type I Contacts — 408-7192

Type II Contacts — 408-6810, 408-1786, 408-7267

Type III+ Contacts — 408-7414, 408-9819

Type VI Contacts — 408-9819, 408-7680, 408-7716

Type XII Contacts — 408-2095

Contact Current Carrying Capability

The total current capacity of each contact is dependent upon the heat rise resulting from the combination of electrical loads on all the contacts in the connector arrangement and the maximum ambient temperature in which the connector will be operating. Caution must be taken to assure that these combinations of conditions do not cause the internal temperature of the connector to exceed the maximum operating temperature of the housing material. There are several variables which must be considered when determining the maximum current capability of your application.

These variables are:

- a) Wire Size — Larger wire will carry more current since it has less internal resistance to current flow and generates less heat. The wire also conducts heat away from the connector.
- b) Connector Size — In general, the more circuits in a connector, the less current per contact can be carried.
- c) Ambient Temperature — The higher the ambient temperature, the less current can be carried.

*Type I contacts cannot be used in cavities 1, 2, 7 and 8.

†Order contacts separately, see below and pages 5163-5166.

Multimate Contacts

Type I Contacts

Contact size — 12

Pin diameter — .094 [2.39]

Test current — 23 amperes*

Materials:

Contact Body — Copper alloy

Spring — Stainless steel

Finish — .000030 [0.00076] gold over .000030 [0.00076] nickel

*Note: Current carrying capability depends on wire size, connector size and ambient temperature.

¹Overall insulation crimp diameter, including crimp barrel, must not exceed .125 [3.18].

²For AMP-TAPETRONIC Machine Part Number 69875, order contacts by Tape Mounted Contact No., plus packaging code "IM REEL" (5000 parts per reel).

³Grounding pin is used to provide a make-first/break-last condition when mating and unmating connector halves.

⁴Use turret TH502 (1-601967-6) with hand tool 601967-1.

⁵Use turret TH501 (1-601967-5) with hand tool 601967-1.

⁶Pin length is .630±.005 [16.002±.127] on these two pins.

⁷Die Set requires "C" Head Adapter Part Number 318161-1; Adapter Holder Part Number 356304-1 (with ratchet) or 189928-1 (without); and Power Unit Part Number 189721-2 (hand actuated) or 189722-2 (foot actuated).

*Commercial PRO-CRIMPER II Hand Tool for field repair use only. Note: Die Set can be adapted for use with the 626 Pneumatic Tool System.

†Does not use Hand Tool 91539-1 or 601967-1.

‡Single contact, free-air test current is not to be construed as contact rating current.

Insertion Tool Part Number 200893-2 (for insulation diameters .070 [1.78] or less).

Extraction Tool Part Number 305183.

¹Overall insulation crimp diameter, including crimp barrel, must not exceed .125 [3.18].

².000015 [0.00038] gold in the mating area over .000030 [0.00076] min. nickel.

³.000030 [0.00076] gold in the mating area over .000030 [0.00076] min. nickel.

⁴Contacts can only be used in Metrimate, Series 1 (Arr. 23-24), Series 4 (Arr. 23-13M, 23-16M, 23-22M), and VDE connectors.

⁵To use with the 626 Pneumatic Tool System: remove the crimping head from the Straight Action Hand Tool (SAHT) Assembly, order SAHT Adapter (Contact Technical Support for Part Number), Adapter Holder Part Number 356304-1 (with ratchet) or 189928-1 (without), and Power Unit Part Number 189721-1 (hand actuated) or 189722-1 (foot actuated).

*Commercial PRO-CRIMPER II hand tool for field repair only. Note: Die Set can be adapted for use with the 626 Pneumatic Tool System.

‡Single contact, free-air test current is not to be construed as contact rating current. Use only for testing.

Insertion Tool Part Number 91002-1 (for insulation diameters .070 [1.78] or less), Number 200893-2 (for insulation diameters .090 [2.29] max.).

Extraction Tool Part Number 305183.

***Contact Technical Support for Automatic Machine Applicator Part Numbers.

Multimate Contacts

Type VI Contacts

Contact size — 16

Pin diameter — .062 [1.57]

Test current — 13 amperes*

Material — Copper alloy

Contact Finish:

A — Tin

B — Gold flash over .000050 [0.00127] nickel on entire contact with .000030 [0.00076] selective gold plating on contact area

Pin

Socket

*Note: Current carrying capability depends on wire size, connector size and ambient temperature.

- Notes:**
1. Plugs for pin modules mate with receptacles for socket modules, and plug for socket modules mate with receptacles for pin modules.
 2. Completely assembled connectors are available upon request. Consult Tyco Electronics for part nos. of specific arrangements desired.
 3. Pin and socket modules for these shells are presented on page 5160.
 4. For cable clamps and latching hardware, see pages 5172 and 5173.

*Two Cable Bushings are included to provide .625 [15.88] and .250 [6.35] diameter cable outlets.

**Four Cable Bushings are included to provide .938 [23.83], .750 [19.05], .625 [15.88] and .250 [6.35] diameter cable outlets.

Note: These cable clamps can be used on either a plug or receptacle shell of the appropriate size; refer to pages 5169-5171.

**Cable Clamps, 90° Cable
Exit (For One-Module Shell)**

Part Number 206132-1

Material and Finish

Clamp — Steel, cadmium plated

Shell — Thermoplastic, gray

Fillister Head Screws — Cold rolled steel, zinc plated

Note: This cable clamp can be used on either a plug or receptacle shell, one-module size only, refer to page 5169.

Strain Relief (for Three-Module Shell)

Part Number 202567-1

Note: This strain relief can be used on either a plug or receptacle shell, three-module size only, refer to page 5171.

Locking Latch Assembly

Part Number 202832-1
(without mounting hardware)

Part Number 202832-2
(with mounting hardware*)

*Mounting hardware includes four lock washers, 4-40 hex nuts and fillister head screws.

Notes:

1. Locking Latch Assemblies are packaged two per unit.
2. Locking Latch Assemblies can be used on either a plug or receptacle shell. They cannot be used with shells having floating bushings.
3. Locking Latch Assemblies must

Locking Spring

Part Number 202577-1
(without mounting hardware)

Part Number 202577-2
(with mounting hardware*)

Spring Catch

Part Number 202576-1
(without mounting hardware)

Part Number 202576-2
(with mounting hardware*)

*Mounting hardware includes two lock washers, 4-40 hex nuts and screws.

Notes:

1. Locking springs and spring catches are packaged two per kit.
2. Locking springs and spring catches can be used on either a plug or receptacle shell. They cannot be used with shells having floating bushings.

CERTI-CRIMP and CERTI-CRIMP II Hand Tools

These tools are ideal for small production, prototype and experimental applications. They are used for terminating pin and socket contacts to wire and feature the CERTI-CRIMP ratchet device to form accurate crimps each time.

Hand Tool Part Number 69710

CERTI-CRIMP II
Straight Action Hand Tool

SDE die in
PRO-CRIMPER frame. Go to
www.tooling.tycoelectronics.com
for additional tooling options
for SDE dies.

626 Pneumatic Tool System

Lightweight, air-operated modular tooling system. Accepts a wide variety of interchangeable heads for crimping various types of contacts, terminals and splices onto wires ranging 6-26 AWG [13-0.12 mm²], plus coaxial and fiber optic cable. Available with either hand- or foot-actuation switch. Optional ratchet control available to provide complete crimp cycle.

Specifications

Outside Diameter — 1.83 [46.5]

Length — 11.6-12.9 [295-327]

Grip Span — 2.19 [55.6] over button/handle

Weight — 2.3-3.3 lb [1.0-1.5 kg]

Air — 90-100 psi [6.21-6.89 bar], 11.14 in³ [0.00018 m³]

Cycle Time — 0.7-0.8 sec (16-14 AWG [1.3-2 mm²] PIDG Terminals)

For more information, request Catalog 124208.

AMP-O-LECTRIC Model "K" Terminating Machine, 1-471273-3

Semiautomatic bench machine for use with standard-style applicators. It is an electrically-powered, clutched, flywheel-energy-style machine, equipped with a mechanical strip feed mechanism. Products commonly applied with this machine include AMP splices, AMPLIVAR splices, and FASTON flag receptacles.

Specifications

Width — 21 [533]

Depth — 20 [508]

Height — 24 [610] without reel

Weight — 230 lb [104 kg]

Electrical — 120 VAC, 60 Hz, 6 A

Air — 90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 m³/s] when required with air-feed applicators

Wire Range — 26-10 AWG [0.12-6 mm²] solid or stranded, depending on product applied

For more information, contact Tyco Electronics.

AMP-O-LECTRIC Model "G" Terminating Machines, 354500-1, -9, -11

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience. All models are equipped with either manual or automatic precision adjustment of crimp height. Machine-mounted sensors are available for crimp quality monitoring using conventional miniature-style applicators.

Specifications

Width — 18.7-25.3 [475-643] depending on applicator type

Depth — 21.5-28.1 [546-713] depending on applicator type

Height — 20 [508]

Weight — 240 lb [110 kg]

Electrical — 120 or 220 VAC, 50 or 60 Hz; 310 VA

Air — 90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 m³/s] when required with air-feed applicators

Wire Range — 26-10 AWG [0.12-6 mm²] solid or stranded, depending on product applied

For more information, request Catalog 65828.

Application Tooling (Continued)

**Entry Level Terminator (ELT),
1338600-1, -2, -3, -4, -5, -6**

Semiautomatic Bench Terminator for side- and end-feed reeled terminals and contacts. The ELT uses a DC motor with gear box drive. The result is a small-footprint design that is fast and quiet. Cycle time is less than 0.400 seconds with an operation sound level of 76dBa. With a crimp force capacity of 3,000 pounds, the ELT is available for all but the highest crimp force applications. A wide range of optional equipment is also available to meet your specific application requirements.

Specifications

Width — 16.8 [427]
Depth — 20.6 [523]
Height — 20 [510] without reel support
Weight — approx. 150 lb [68 kg]
Electrical — 100-240 VAC, 50/60 Hz, 6A (Note: Avg <1 A at 120 VAC when used as a bench-top unit at 2,000 cycles per hour operating rate)
Air — 90-100 psi [6.21-6.90 bar], 6 scfm [0.00282 m³/s] when required for use with air-feed applicators (Note: Optional Air Feed Valve Assembly Required)
Wire Range — Up to 14 AWG [2.5 mm²]
 For more information, request catalog 1308382.

**AMP-O-MATIC Stripper-Crimper Machines,
1320895-1, -2**

Semiautomatic bench crimping machines that also strip the wire, and are therefore used for terminating jacketed cable. Feature manual precision adjustment of crimp height, keyed strip blades for faster, more accurate setups, and an efficient scrap removal system. All adjustments can be made from the front of the machines without special tools. Available with crimp quality monitoring.

Specifications

Width — 14 [355]
Depth — 18 [457]
Height — 33 [838] without reel
Weight — 150 lb [68 kg]
Electrical — 120 VAC, 50 or 60 Hz, .5 A
Air — 80-100 psi [5.52-6.90 bar], 3.5 scfm [0.00165 m³/s]
Wire Range — 32-14 AWG [0.03-2 mm²]
 For more information, request Catalog 65004.

The combination of the Stripping Module with the Entry Level Terminator (ELT) or the AMP-O-LECTRIC Model G Terminator provides an economical and proficient method of stripping wire and crimping terminals on the same machine. Wires are stripped moments before crimping, meaning there is virtually no chance of damaging wire conductors during handling or storage. Once the wire is fed into the start sensor the Stripping Module does the rest, improving placement accuracy.

Specifications

Wire Range Base Module — 0.03 mm² - 2.0 mm² (32-14 AWG) (30-32 AWG may require special kit.)
Max. Insulation — .200 [5.08]
Cable Breakout — > 1.100 [29.00]
Strip Length — .100 - .400 [2.50 - 10.16]
Noise — Less than 82 dBA (Typical at operator position with standard mechanical feed applicator)
Weight — 4.53 Kilograms (10 lb)
Height — 5.000 [127.00]
Electrical — 100-240 VAC, 50/60 Hz, single phase current, obtains power from the terminator
Air — 620-760 kPa (90-100 psi), 2.83 liters/sec (6 scfm)
Wire Sensor — Gold plated contacts with laser etched target
 For more information, request Catalog 1309085.

Application Tooling (Continued)
**AMPOMATOR CLS IV+
Lead-Making Machines,
356500-1, -2**

Fully-automatic machines that measure, cut, strip and terminate single leads. Microprocessor-controlled, and programmed and operated using an easy-to-follow, menu-driven touch-screen. Features include direct-drive terminating units with precision crimp height adjustment, fully programmable setups, wire runout and splice detection, and motorized pre-feed with wire straightener. Crimp quality monitoring is also available.

Specifications

Width — 159 [4 040]
Depth — 68 [1 730]
Height — 86 [2 185] with 24 [610] dia. reel
Weight — 2 000 lb [907 kg]
Electrical — 220 VAC, 50 or 60 Hz, single phase, 25 A, with neutral and ground
Air — 90 psi [6.21 bar], 15 scfm [0.0071 m³/s] sustained
Wire Range — 26-10 AWG [0.12-6 mm²] stranded, 26-16 AWG [0.12-1.4 mm²] solid
Lead Lengths — 3-90 [76.2-2 285], 90-1 000 [2 285-25 400] with long lead conveyors

For more information, request Catalog 124324.

Gamma 333 PC Lead-Making Machine, Three Stations, 1-528324-1

With its capacity to accommodate an additional processing station on side 1, the Gamma 333 PC can perform a number of new processes. It can produce two-ended crimp leads, process double crimp connections with three different terminals or apply seals on one end of the wire. Tinning and ink jet marking are two further options. Process monitoring is integrated into the system, for accurate trimming and stripping of the wires.

Specifications

Length — 125 [3137]
Width — 54.2 [1377]
Height — 70.5 [1790]
Length Range — 2.36 in-32.8 ft [60-10,000] (optional 30mm)
Cross-Section Range — AWG 26-AWG 10 [0.125mm²-5mm²]
Noise Level — <76dB (without crimping modules)
Electrical — 3x208 - 480V, 50-60Hz; 6kVA
Compressed Air — 5-6 bar
Air Consumption — 6.5m³/h
Weight — 1850 lbs [840 kg] with two crimping modules

For more information, request Catalog 1307901.

Crimp Quality Monitor (CQM), 1320420-1, -2

This unique system provides 100% on-the-fly crimp inspection. It measures the crimp height of each termination, and evaluates the quality of each crimp. If a crimp is questionable, the monitor alerts the operator with both visual and audible alarms. It also provides ports for printing and networking. When used with AMP-O-LECTRIC Model "G" Termination Machines, the monitor is mounted to the

machine. When used with AMPOMATOR CLS IV Lead-Making Machines, it is integrated into the machine's operating system.

Specifications

Width — 8.8 [220]
Depth — 8.1 [205]
Height — 4.6 [115]
Weight — 5 lb [2.3 kg]
Electrical — 100-240 VAC, 50/60 Hz, 3.2 A

For more information, request Catalog 82275.

Introduction

Product Facts

- Plug and receptacle connectors are molded plastic blocks categorized by the number of contact positions and type of material
- The pin body is fabricated from brass and conforms to MIL-C-50 or ASTM-B-36. The plating is gold per MIL-G-45204 over nickel per QQ-N-290. The retention spring sleeve is fabricated from stainless steel and conforms to QQ-S-766
- The socket body is made of brass per MIL-C-50 or ASTM-B-36. Plating is gold per MIL-G-45204 over nickel per QQ-N-290. The stainless steel retention spring sleeve conforms to QQ-S-766
- Shields and cable clamps are molded polysulfone components conforming to MIL-P-46120
- Brass keying pins and sockets conform to QQ-B-626 or ASTM-B-16, with zinc plating per QQ-Z-325 or stainless steel per QQ-S-763
- Locking rings, washers, bushings, retaining rings, nuts and screws are stainless steel conforming to QQ-S-763 or QQ-S-766
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476

High Density Rectangular (HDR) connectors are designed in response to ever-increasing demands for miniaturization. The grid spacing of .100 x .100 [2.54 x 2.54] provides density for a connector accommodating a 20 thru 30 AWG [0.6 thru 0.05 mm²] wire range.

A variety of contact configurations and platings permits great design flexibility. Machine terminated, crimp snap-in contacts are available for the entire wire range. Also available are .025 [0.64] square posts on pin and socket contacts suitable for wrap-type wiring.

This unique connector is available in 12, 24, 36, 48, 54 and 106 positions in a rectangular housing. A special 95-position connector rounds out this group of rack and panel configured connectors.

A two piece, 80-position connector has been developed for printed circuit boards.

Versatility is designed into this family of connectors. Housings are available with or without center fasteners. Housing material for most connectors is diallyl phthalate or phenolic. When

mounting connectors with jackscrews, the receptacle half should be mounted to the chassis or panel. The turnable jackscrews should be positioned on the plug half containing the cable assembly.

Tooling for terminating leads is also available to meet production requirements. For limited production or prototype applications, the CERTI-CRIMP hand tool is ideal. Automatic machines are designed to fit various in-plant production needs.

Technical Features

Available Number of Positions — 12, 24, 36, 48, 54, 106
Center Spacing — .100 [2.54] x .100 [2.54]
Housing material — Diallyl Phthalate or Phenolic
Flammability Rating — UL 94V-0, UL File No. E28476
Contact Material — Brass
Contact Finish — .000030 [0.00076] Au
Contact Size — 20
Wire Size Range — 20–30 AWG

Termination Resistance —

AWG	Gold	Tin
20	8.0	16.5
24	14.5	27.0
26	22.0	—
30	48.0	—

Connector Mating Per Circuit — Gold 25 oz./Contact

Performance Characteristics

Dielectric Withstanding Voltage — 1000 VAC

Insulation Resistance —

DAP 50,000 megohms min. (initial), Phenolic 5000 megohms min. (initial)

Voltage Rating — 440 VAC Sea Level @ 3 Amp max.

Connector Mating/Unmating —

Gold 25 oz. max., Tin 50 oz. max.

Contact Retention Force —

DAP — 5.0 lb., Phenolic — 7.5 lb.

Durability — 500 Matings per Cycle

Gold, 250 Matings per Cycle Tin

Temperature Range — DAP -85°F to 257°F [-65°C to 125°C], Phenolic - 131°F to 302°F [55°C to 150°C]

Thermal Shock — DAP -85°F to 257°F [-65°C to 125°C], Phenolic - 131°F to 302°F [55°C to 125°C]

Maximum Current — 3 Amp max.

Type XI crimp/snap-in contacts may be applied with hand tools, semi-automatic bench equipment or fully-automatic lead-making machines.

CERTI-CRIMP II Straight Action Hand Tools (SAHT)

Premium grade hand tools. Feature ratchet control to provide complete crimp cycle. Die sets close in a straight line. Include a contact locator and wire stop, plus an insulation crimp adjustment lever, when applicable. Approximate weight 1.3 lb [0.59 kg].

High Density Rectangular Connectors

Application Tooling

AMP-O-LECTRIC Model "K" Terminating Machine, 1-471273-3

Semiautomatic bench machine for use with standard-style applicators. It is an electrically-powered, clutched, flywheel-energy-style machine, equipped with a mechanical strip feed mechanism. Products commonly applied with this machine include AMP splices, AMPLIVAR splices, and FASTON flag receptacles.

Specifications

Width — 21 [533]

Depth — 20 [508]

Height — 24 [610] without reel

Weight — 230 lb [104 kg]

Electrical — 120 VAC, 60 Hz, 6 A

Air — 90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 m³/s] when required with air-feed applicators

Wire Range — 26-10 AWG [0.12-6 mm²] solid or stranded, depending on product applied

For more information, contact Tyco Electronics.

AMPOMATOR CLS IV+ Lead-Making Machines, 356500-1, -2

Fully-automatic machines that measure, cut, strip and terminate single leads. Microprocessor-controlled, and operated using an easy-to-follow, menu-driven touch-screen. Features include direct-drive terminating units with precision crimp height adjustment, fully programmable setups, wire runout and splice detection, and motorized pre-feed with wire straightener. Crimp quality monitoring is also available.

Specifications

Width — 159 [4 040]

Depth — 68 [1 730]

Height — 86 [2 185] with 24 [610] dia. reel

Weight — 2 000 lb [907 kg]

Electrical — 220 VAC, 50 or 60 Hz, single phase, 25 A, with neutral and ground

Air — 90 psi [6.21 bar], 15 scfm [0.0071 m³/s] sustained

Wire Range — 26-10 AWG [0.12-6 mm²] stranded, 26-16 AWG [0.12-1.4 mm²] solid

Lead Lengths — 3-90

[76.2-2 285], 90-1 000

[2 285-25 400] with long lead conveyors

For more information, request Catalog 124324.

Crimp Quality Monitor (CQM), 1320420-1, -2

This unique system provides 100% on-the-fly crimp inspection. It measures the crimp height of each termination, and evaluates the quality of each crimp. If a crimp is questionable, the monitor alerts the operator with both visual and audible alarms. It also provides ports for printing and networking. When used with AMP-O-LECTRIC Model "G" Termination Machines, the monitor is mounted to the machine. When used with AMPOMATOR CLS IV+ Lead-Making Machines, it is integrated into the machine's operating system.

Specifications

Width — 8.8 [220]

Depth — 8.1 [205]

Height — 4.6 [115]

Weight — 5 lb [2.3 kg]

Electrical — 100-240 VAC, 50/60 Hz, 3.2 A

For more information, request Catalog 82275.

AMP-O-LECTRIC Model "G" Terminating Machines, 354500-1, -9, -11

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience. All models are equipped with either manual or automatic precision adjustment of crimp height. Machine-mounted sensors are available for crimp quality monitoring using conventional miniature-style applicators.

Specifications

Width — 18.7-25.3 [475-643] depending on applicator type
Depth — 21.5-28.1 [546-713] depending on applicator type
Height — 20 [508]
Weight — 240 lb [110 kg]
Electrical — 120 or 220 VAC, 50 or 60 Hz; 310 VA
Air — 90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 m³/s] when required with air-feed applicators
Wire Range — 26-10 AWG [0.12-6 mm²] solid or stranded, depending on product applied
 For more information, request Catalog 65828.

Entry Level Terminator (ELT), 1338600-1, -2, -3, -4, -5, -6

Semiautomatic Bench Terminator for side- and end-feed reeled terminals and contacts. The ELT uses a DC motor with gear box drive. The result is a small-footprint design that is fast and quiet. Cycle time is less than 0.400 seconds with an operation sound level of 76dBa. With a crimp force capacity of 3,000 pounds, the ELT is available for all but the highest crimp force applications. A wide range of optional equipment is also available to meet your specific application requirements.

Specifications

Width — 16.8 [427]
Depth — 20.6 [523]
Height — 20 [510] without reel support
Weight — approx. 150 lb [68 kg]
Electrical — 100-240 VAC, 50/60 Hz, 6A (Note: Avg <1 A at 120 VAC when used as a bench-top unit at 2,000 cycles per hour operating rate)
Air — 90-100 psi [6.21-6.90 bar], 6 scfm [0.00282 m³/s] when required for use with air-feed applicators (Note: Optional Air Feed Valve Assembly Required)
Wire Range — Up to 14 AWG [2.5 mm²]
 For more information, request catalog 1308382.

AMP-O-MATIC Stripper/Crimper Machine, 1320895-1

Semiautomatic bench crimping machines that also strip the wire, and are therefore used for terminating jacketed cable. Feature manual precision adjustment of crimp height, keyed strip blades for faster, more accurate setups, and an efficient scrap removal system. All adjustments can be made from the front of the machines without special tools. Available with crimp quality monitoring.

Specifications

Width — 14 [355]
Depth — 18 [457]
Height — 33 [838] without reel
Weight — 150 lb [68 kg]
Electrical — 120 VAC, 50 or 60 Hz, .5 A
Air — 80-100 psi [5.52-6.90 bar], 3.5 scfm [0.00165 m³/s]
Wire Range — 32-14 AWG [0.03-2 mm²]
 For more information, request Catalog 65004.

Stripping Module

The combination of the Stripping Module with the Entry Level Terminator (ELT) or the AMP-O-LECTRIC Model G Terminator provides an economical and proficient method of stripping wire and crimping terminals on the same machine. Wires are stripped moments before crimping, meaning there is virtually no chance of damaging wire conductors during handling or storage. Once the wire is fed into the start sensor the Stripping Module does the rest, improving placement accuracy.

Specifications

Wire Range Base Module — 0.03 mm² - 2.0 mm² (32-14 AWG) (30-32 AWG may require special kit.)
Max. Insulation — .200 [5.08]
Cable Breakout — > 1.100 [29.00]
Strip Length — .100 - .400 [2.50 - 10.16]
Noise — Less than 82 dBA (Typical at operator position with standard mechanical feed applicator)
Weight — 4.53 Kilograms (10 lb)
Height — 5.000 [127.00]
Electrical — 100-240 VAC, 50/60 Hz, single phase current, obtains power from the terminator
Air — 620-760 kPa (90-100 psi), 2.83 liters/sec (6 scfm)
Wire Sensor — Gold plated contacts with laser etched target
 For more information, request Catalog 1309085.

Product Facts

- Low-profile rectangular design for high packaging density
- Environmental sealing for aerospace applications
- Modular components for design versatility and logistics savings
- Lightweight materials for weight savings
- Quick-disconnect mating hardware

METRIC

Dimensions in this section are millimeters over inches

System

The Raychem MTC product line is a complete modular connector system consisting of lightweight, environmentally sealed miniature rectangular connectors (shell housings with removable inserts) and individually removable rear-release contacts.

Components

MTC connectors are now available with quick-disconnect mating hardware, EME shielding accessories, and modular inserts that can accommodate a mix of signal and power crimp contacts and coaxial contacts. The need for special termination tooling has

been minimized, while the ease of manufacturing and maintenance has been improved.

Configurations

MTC rectangular connectors using jack screws or quick-disconnect hardware can be stacked or panel-mounted next to each other without any provision for grip space, a feature that can save significant panel area.

MTC connectors are available in 1-inch and 2-inch configurations. Modular removable inserts with size 22 and/or size 16 contact cavities can be combined into the 1-inch and 2-inch MTC housings.

Inserts

MTC inserts are available in 20-cavity and 5-cavity versions. The 20-cavity insert accepts size 20-22 (24 AWG to 20 AWG wire) crimp contacts. The 5-cavity insert accepts size 16-14 crimp contacts. Insertion/extraction of the contacts is rear release.

Note:

Other configurations are available in the MTC family (size 12 contacts; 50 mil spacing for double density; accessories). Please contact Tyco Electronics.

20-Cavity Inserts

2-inch shell with inserts

MTCP-122-20 inserts are used with MTC100 1-inch and 2-inch shells.
The 1-inch shell takes:

- One MTCP-122-20P (pin contact) **or**
- One MTCP-122-20S (socket contact)

The 2-inch shell takes:

- One MTCP-122-20P1 and one MTCP-122-20P2 (pin contact) **or**
- One MTCP-122-20S1 and one MTCP-122-20S2 (socket contact)

**2 x 20 Cavity Inserts
(Size 20-22)—2-Inch Shell**

5-Cavity Inserts

5-Cavity Inserts (Size 16)

MTCP-116-05 inserts are used with MTC100 1-inch and 2-inch shells.

The 1-inch shell takes:

- One MTCP-116-05-P1 (pin contact) **or**
- One MTCP-116-05-S1 (socket contact)

The 2-inch shell takes:

- One MTCP-116-05P1 and one MTC-116-05P2 (pin contact) **or**
- One MTCP-116-05-S1 and one MTCP-116-05-S2 (socket contact)

MTCP-116-05P2	MTCP-116-05S2

**Contacts for 5-Cavity
Inserts**

The contacts for 5-cavity inserts must be ordered separately. They include:

- CTA-0079 - pin contact (MS 27493-16) (MIL-C-39029/58 intermateable)
- CTA-0078 - socket contact (MS 27491-16) (MIL-C-39029/57 intermateable)
- D-602-0140 - coaxial pin contact (MIL-C-39029/76 intermateable)
- D-602-0171 - coaxial socket contact (MIL-C-39029/78 intermateable)

Other contacts designed for M38999 Series II connectors can be used.

Pin Contact	Socket Contact
D-602-0140 (coaxial)	D-602-0171 (coaxial)
CTA-0079 (power)	CTA-0078 (power)

Hybrid Inserts

Hybrids

Hybrid insert combinations of size 22 and size 16 contact cavities are also possible.

2-Inch Shell—Hybrid Assembly

Power and signal

Shells

MTC connector housing shells are available with nickel plating (48-hr salt spray performance) or cadmium over nickel plating (500-hr salt spray performance).

MTC connector housings are offered with quick-disconnect or jack-screw mating hardware. Each connector shell is polarized and has 64 user-defined keying combinations. Lightweight, low-profile EME backshells are also available for increased shielding effectiveness of the connector.

MTC Shells Ordering Information

M T C 1 0 0 X - X H X - X X 2

*Some combinations of shells, mating hardware and EME shielding accessories are not available.
Contact Tyco Electronics for product information.

Accessories

Low-Profile EME Backshells

Lightweight rectangular EME backshells connect the overall bundle shield to the MTC connector housing. Individual cable shields can also be terminated to the backshell braid by using Raychem SolderSleeve devices.

The backshell is mounted on the MTC housing via the cable clamp screws.

MTC backshell features include a low profile, light weight, and Level II EME performance.

EME Backshell Adapters

CHA-0275 2-inch adapter (plug or receptacle)

CHA-0276 1-inch adapter (plug or receptacle)

MTC shield-grounding busbars Raychem MTC shield-grounding busbars allow for simple, cost-effective termination of cable shielding to MTC aluminum housings.

Two-inch shield-grounding busbars terminate up to 20 shielded twisted pairs on a 2-inch MTC connector. The individual shields are terminated to "fingers" on the busbar with Raychem SolderSleeve devices.

The busbar is mounted on the MTC housing via cable clamp screws.

MTC busbar features include a simple termination, cost effectiveness, light weight, and Level I EME performance.

Shield-Grounding Busbars

CTA-0022 1-inch busbar (with 5 SolderSleeve terminators)

CTA-0023 2-inch busbar (with 10 SolderSleeve terminators)

EME Shielding Accessories for MTC Connectors

Grounding Block

Allows for cable shield termination grounding on the MTC shell housing via crimp-removable contacts. This grounding scheme allows individual cables to be removed from the connector without cutting a ganged ground connection. Sufficient ground contacts are available to handle shielded twisted-pair cables.

CHA-0301 1-inch grounding block receptacle shell

CHA-0302 2-inch grounding block receptacle shell

CHA-0303 1-inch grounding block plug shell

CHA-0304 2-inch grounding block plug shell

Introduction

Product Facts

- The TJS connections are inherently more reliable than conventional threaded and solder terminations.
- The user's wiring is crimped to gold plated pin contacts, conforming the MIL-C-39029/1, which are individually mated to probe-proof gold plated pre-bussed sockets contained within the module and splice.
- Modules and Splices — environment proof conforming to the requirements of MIL-T-81714. These modules can be assembled into MIL-T-81714 rails and are individually removable. Brackets are also available to mount individual or triads of modules. The splices are designed to terminate from two to four wires.
- Commercial TJS consists of module blocks (either environmental or non-environmental) designed for custom assembled installations. These can be furnished in pre-assembled arrays in rails or individually with rail kits to accommodate various rows and lengths of modules.
- TJS Connectors also qualified to German Army Standard VG 95212-31/ VG 95231-102/103/105

The Terminal Junction System (TJS) provides design engineers with a compact family of modules and splices for interconnecting wires. Both the modules and splices facilitate interconnecting with pre-bussed configurations to which the user's 22 thru 12 AWG wires are terminated with crimped removable pin contacts. Servicing tools required are the commonly available MIL-C-81969/14, plastic tool and MIL-C-22520 crimping tool used

for rear release connector contacts.

The TJS eliminates many shortcomings of the conventional lug and threaded termination. The TJS has no loose attaching hardware, such as nuts, screws and lock-washers to complete the termination. The TJS saves space and weight over threaded terminations while reducing installation cost. There is complete electrical isolation and optional environmental

sealing grommet in the TJS without user installed busses, barriers, insulating strips, potting and enclosures. The TJS module pre-bussed integral sockets are permanently connected in a variety of bussing arrangements to suit the most exacting circuit requirements. These modules can be user assembled into any required bussing arrangement and contact size permutation.

Typical Module Construction (Cross-Section)

Module With Sealing Plug Installed (Cross-Section)

Performance Specifications

Voltage Rating —

Sizes 22, 20, 16, 12

Altitude	DWV*	Working Voltage
Sea level	1,500 V	600 V
70,000 Feet**	600 V	300 V

Size 21 (22HD)

Altitude	DWV*	Working Voltage
Sea Level	1,000 V	600 V
70,000 Feet**	325 V	300 V

* DWV = Dielectric Withstanding Voltage

** [21,336m]

Contact Voltage Drop (Max.) —

Contact Size	Test Current	Initial	After Conditioning
21 (22HD)	5.0 A	55 V	65 V
22	5.0 A	45 V	50 V
20	7.5 A	45 V	50 V
16	13.0 A	50 V	55 V
12	23.0 A	40 V	45 V

The MV drop is measured across an adjacent bussed pair of wire contacts.

Operating Temperature Range —

Class	Minimum	Maximum
D	-65°C (-85°F)	+200°C (+392°F)

Altitude Immersion —

Insulation resistance shall not fall below 5,000 megohms after being subjected to three, 70,000-foot [21,336m] altitude immersion cycles in salt water.

Fluid Immersion —

Class D— Extended fluid type

Fluid	
MIL-H-5606	Hydraulic fluid
MIL-L-23699	Lubricating oil
MIL-T-5624	Aviation fuel
MIL-L-7808	Lubrication oil
MIL-A-8243	Anti-ice fluid
MIL-C-25769	Cleaning fluid
Skydrol	500A & 500B
Aerosafe	2300 & 2300W
Flyjet	III
Esso Oil	Turbo 25

Moisture Resistance —

High Humidity (95% RH) 100 megohms min.

After Drying— 24 hours 1,000 megohms min.

Durability —

No performance degradation after 10 cycles of contact insertion/removal.

Vibration —

Class D

Sine, MIL-STD-202, method 204 condition G

Random, MIL-STD-1344, method 2005.

Shock —

Class D

MIL-STD-1344, Method 2004

(300 G, 3 milliseconds duration, half-sine).

Feedback and Feedthru Terminal Junction Modules

MIL-T-81714 Terminal Junction module blocks are available in sizes 12, 16, 20, 22 and 22HD. The size 12 and 16 feedback blocks have eight cavities each. The size 20 and 22 feed-back blocks have 10 cavities each (size 22HD has 21 cavities). The feedthru blocks have the same number of cavities situated on both sides of the block.

Military bussing arrangements are available with each size block.

These module blocks and mounting rail assemblies are qualified to MIL-T-81714. The pin contacts are qualified to MIL-C-39029/1.

Wire Splices

Single Splice

Built and qualified to MIL-T-81714, the commercial Single Wire Splice provides an environmentally reliable, positive and maintainable in-line disconnect between single wires. Their small diameter permits placement within a wire bundle or electrical harness. The standard M39029/1 pin contact is utilized. Single wire splices are available per MIL-T-81714.

Double Splice

Provides an environmental in-line disconnect for joining up to four wires. Bussed or unbussed contacts are available permitting the versatility of joining wires in double, triple or quadruple combinations.
